

Fresh Living Tip

Expert bartenders insist that ice is the most important ingredient and choosing the right kind can make or break your drink. The purer the ice, the better a drink will taste as the ice melts. And, clarity is the best indicator for purity, as is the case with the Marvel Clear Ice Machine, considered the clearest, most pure ice available for residential use.

FINISH OPTIONS

15" Marvel Low Profile Clear Ice Machine

MACP215 & MACL215

Performance

- Discretely quiet operation with Silent Mode option
- Engineered to consistently produce pure ice with exquisite clarity and slow melt
- Uniform ice size and compact density
- Produces up to 39 pounds of clear ice daily, the equivalent of nearly eight convenience-store bags of ice
- Large-capacity bin stores up to 23 pounds of clear ice, while preserving quality and assuring fresh ice production
- Ice scoop holder included
- Single-connection water fitting for simple installation
- Thermal-efficient cabinet insulates cooling environment and ensures optimum energy efficiency while maximizing capacity

Convenient Controls

- Integrated controls feature convenient settings and programmability
- Audible alerts, cleaning reminders and Sabbath Mode
- Silent Mode automatically postpones operation by 3 hours

Fit & Finish

- Low profile, ADA-compliant height allows for universal installation applications
- Illuminice arctic white LED light casts a dazzling illumination effect
- Elegant midnight black monochromatic interior
- Easy-to-clean interior surface
- Reversible door allows for right or left swing for adaptable installation
- Black toe kick adjustable to 4" with leveling legs

Warranty

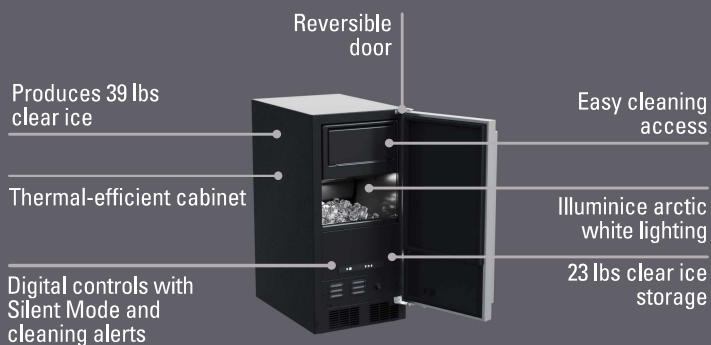

- 1-year parts and labor warranty and 5-year sealed system parts warranty

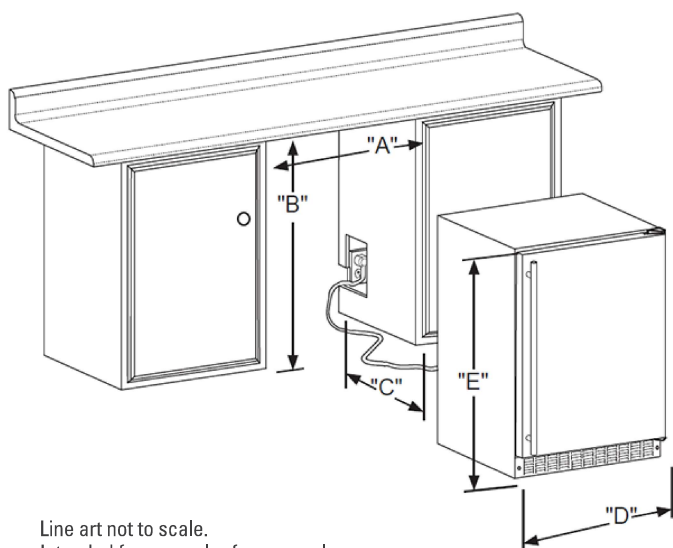

Much like a fine chocolatier slowly tempers chocolate to a solid state for the best quality and flavor, Marvel Clear Ice employs a fractional freezing process to create high-density, slow-melting ice with the ultimate clarity and purity. As water runs over the cold plate, pure water freezes first. Dissolved solids are carried away into the water reservoir, giving you crystal-clear ice that cools your drinks without affecting the flavor.
