MONOGRAM 30" STAINLESS STORAGE DRAWER

ZXS900SSNSS

THE MONOGRAM MINIMALIST COLLECTION

Streamlined design and precisely machined metals create a contemporary yet functional aesthetic

LARGE-CAPACITY STORAGE DRAWER

Offering a contemporary yet functional design, this spacious 1.9 cu. ft. drawer stores all your cookware beautifully.

PUSH-TO-OPEN DRAWER

Handle-free, push-to-open drawer adds a touch of elegant simplicity and stylish convenience.

SPECIFICATIONS

Overall Width	29 3/4" (75.5 cm)
Overall Height	6 11/16" (16.9 cm)
Overall Depth	23 7/16" (59.5 cm)
Drawer Capacity	1.90 cu. ft. (53.8 l)
Standard Cut-out Width	28 1/2" (72.4 cm)
Standard Cut-out Height	5 5/16" (15.1 cm)
Standard Cut-out Depth	22 1/8" (53.6 cm)
Net Weight	54 lbs. (24.5 kg)
Approx. Shipping Weight	60 lbs. (27.2 kg)

OVERALL DIMENSIONS

For more details refer to the installation instructions for this product.

Dimensions in parentheses are in centimeters unless otherwise noted. Actual product dimensions may vary due to manufacturing tolerances.

STANDARD INSTALLATION

FLUSH INSET INSTALLATION TOP VIEW

HELPFUL TIPS

- A If you are installing in frameless cabinets, it may be necessary to install 1/2" wide cleats to accept drawer mounting screws. See drawer for mounting screw locations.
- B Install an anti-tip block against rear wall, 5 5/8" from floor of cutout to bottom of block. The anti-tip block must be installed to prevent the drawer from tipping forward when opened and loaded. Failure to add the anti-tip block could result in personal injury.
- When installing the storage drawer below a cabinet drawer, a solid barrier must be installed at least above the storage drawer to block access. Use any solid material such as 1/4" thick plywood. Allow at least 1/4" air gap between the barrier and the top of the storage drawer. Observe the 3/8" min. above the toe kick installation height.
- D The storage drawer may be supported by either a solid bottom or 2"x2" or 2"x4" runners. The support must be level and rigidly mounted, flush with the bottom edge of the cut-out (there is no way to level the drawer once it has been installed, so make sure that the supports are level). The floor or runners must be capable of supporting at least 65 lbs.
- E Cabinet surfaces must be an appearance finished surface for flush installation.
- F Cleats may be visible and should be finished to match cabinetry.

INSTALLATION BELOW COOKTOP

STANDARD INSTALLATION FRONT VIEW

SIDE BY SIDE INSTALLATION

HELPFUL TIPS

- Additional clearance between cut-outs may be required. Check to be sure that oven supports above the storage drawer location do not obstruct the required interior 23-1/2" depth and 5-7/8" height.
- B If you are installing in frameless cabinets, it may be necessary to install 1/2" wide cleats to accept drawer mounting screws. See drawer for mounting screw locations.
- Install an anti-tip block against rear wall, 5 5/8" from floor of cutout to bottom of block. The anti-tip block must be installed to prevent the drawer from tipping forward when opened and loaded. Failure to add the anti-tip block could result in personal injury.
- When installing the storage drawer below a cooktop, a solid barrier must be installed at least 1" from the lowest point of the bottom of cooktop burner box to the top of the cut-out. Use any solid material such as 1/4" thick plywood. Allow at least 1/4" air gap between the barrier and the top of the storage drawer. Observe the 3/8" min. above the toe kick installation height.
- E When installing two storage drawers side by side, install them in separate cut-outs and allow a 1-3/4" min. gap between each cut-out.

FLUSH INSET INSTALLATION

HELPFUL TIPS

- A Install an anti-tip block against rear wall, 5 5/8" from floor of cutout to bottom of block. The anti-tip block must be installed to prevent the drawer from tipping forward when opened and loaded. Failure to add the anti-tip block could result in personal injury.
- B The storage drawer may be supported by either a solid bottom or 2"x2" or 2"x4" runners. The support must be level and rigidly mounted, flush with the bottom edge of the cut-out (there is no way to level the drawer once it has been installed, so make sure that the supports are level). The floor or runners must be capable of supporting at least 65 lbs.
- Cabinet surfaces must be an appearance finished surface for flush installation.

 Cleats may be visible and should be finished to match cabinetry.
- D For optimal finished appearance, Wall Oven must use ZX30VT1 flush vent trim accessory.
