BLUETOOTH

The LG NP8340 30W 1Ch speaker is compatible with many of your favourite streaming services which makes the seamless network with a Mesh Network and dual band technology a key feature to look for. This allows you to enjoy your streaming service with a stable and seamless connection. And, with high quality HD music playback, you can listen to high definition music files for clear and rich sounds. Pair the NP8340 with other LG speakers to create a multi-room speaker system that lets you synchronize your speakers or customize music for each room. The Music Flow Player app will let you easily access your music and control them.

*Internet connection required.

SEAMLESS NETWORK

LG Music Flow is designed to minimize those pesky drops in connection that interrupt your music. The Mesh Network combined with Dual band technology lets you play high definition music files on a more stable and seamless connection.

MULTI-ROOM MODE

With Multi-room Mode, you can customize your home audio experience. Either synchronize your speakers to play the same music with the help of a bridge or let family members choose their own music in separate rooms.

LG MUSIC *flow*

LG MUSIC FLOW PLAYER

LG's Music Flow Player application lets you easily access your music either streamed or stored on compatible devices and control them on your LG wireless speaker.
