IMPORTANT: ONLY USE THE WATER SUPPLY HOSE PROVIDED WITH THIS MACHINE. ASKO provides a quality PEX water fill hose that utilizes a US standard 3/4" brass connection fitting for attachment on the water supply / faucet side and a Metric threaded fitting for the washer side connection.

Every ASKO washer is delivered ready-fitted with a plug and is intended for connection to an ASKO dryer, which is equipped with a matching receptacle. If the washer is used separately or with another dryer, it must be on a separate 220 V, 20 Amp single-phase circuit.

Second-floor (above grade) installations must meet all local building codes.

When placing the washer next to a wall or cabinet, be sure to leave 1/4" (6 mm) of space between the washer and the wall or cabinet.
