

TENCEL™ PANEL
Crafted with natural TENCEL™ fibers, this ultra-conforming knit panel is hypoallergenic, breathable, and features technology that delivers cooling comfort throughout the night.

SILK & WOOL
A natural, responsive blend of silk and wool enhances breathability while helping regulate temperature for a balanced, comfortable sleep.

TERRAPUR™ NATURAL ORGANIC LATEX
Made from sustainable natural latex, its exceptional durability and open-cell design offers stability and pressure relief while evenly distributing body temperature.

AIRELUXE™ FOAM
Aireluxe™ foam provides durable, adaptive support that contours to your body while maintaining proper alignment.

ORGANIC COTTON
Layers of breathable cotton promote natural airflow and add soft, supportive comfort throughout the mattress.

COPPER MICRO COILS
Copper-coated micro coils provide adaptive support, enhanced airflow, and natural antimicrobial benefits.

COOLING-ENRICHED VISCO FOAM
Responsive memory foam infused with Titanium, Graphite, and Copper, designed to dissipate heat, adapt to the body's shape, and provide pressure-relieving support.

BURBANK CHILL PLUSH

AIRELOOM
CALIFORNIA DESIGN · HANDMADE

- 9" or 5.75" profile available
- Adjustable base friendly

NATURAL, LUXURIOUS MATERIALS
The Aireloom Preferred Collection features exquisite natural materials such as silk and wool. Meticulously sourced for sustainability, durability, and comfort, this refined ensemble of layers enhances airflow and helps regulate temperature as you sleep.

OEKO-TEX® STANDARD 100 CERTIFIED
One of the most rigorous safety standards in the industry ensures that every material, from textiles to threads, is lab-tested and free from over 1,000 harmful chemicals and substances providing peace of mind that you're sleeping in a cleaner, safer environment.

ADDITIONAL CERTIFICATIONS
CertiPUR-US® and Eco-INSTITUT ensure foams and materials meet strict safety, performance, and environmental standards, reinforcing comfort and sustainability.
