

MM860 Pro Series

Automated Drop Down & Swivel TV Mount

The award-winning MantelMount presents a motorized mount for high on the wall installations such as over a fireplace. Offering comfortable eye-level viewing, the fully automated MM860 Pro Series TV Mount is second to none!

Distinguishing features include:

- SIMULTANEOUS DROP & SWIVEL** Patented Multi-Axis hub, proprietary software and precision electronic actuators lower and swivel the TV in one quick fluid motion.
- REMOTE CONTROL CHOICES** Controlled through the included 433 MHz RF remote, IR-based Logitech Harmony remotes and popular home automation systems.
- HOME AUTOMATION OPTIONS** Works with Control4, URC, RTI, Crestron, Savant and Logitech, with command sets for hard-coding additional systems.
- POWER SENSING TECHNOLOGY** Detects when the TV is turned on and automatically lowers it to a favorite preset. Provides automation even without a control system.
- SILENT OPERATION** Two custom electronic actuators allow for smooth, barely audible movement.
- RECESSIBLE HOUSING** Conceals the lifting arm and electronics in the raised position. Can be recessed for flush-to-wall installations.
- TEMPERATURE-SENSING MONITOR** TV automatically retracts to its home position when an unsafe temperature is detected.
- MULTIPLE MEMORY PRESETS** Easily program multiple preset positions for favorite viewing locations.
- POWER LOSS RECOVERY** Keeps its last location in memory, eliminating the need for a reset after power interruption.
- SOFT & HARD TRAVEL STOPS** Vertical and horizontal travel limits configured through both software and hardware, provide a virtual safety shield that prevents the TV from touching the wall or mantel.
- PLUG & PLAY NETWORKING** DHCP enabled right out of the box. Easily identifiable on the network.
- ON-BOARD WEB SERVER** For simple browser based configuration.
- ONLINE SOFTWARE UPDATES** Download the latest software and firmware updates from the internet directly to the control module.
- COMMUNICATION PROTOCOLS** Can be managed with IP and RS232 protocol through Ethernet, dry contacts or a serial IRDA port.
- POST-INSTALLATION LEVELING** Allows for screen position refinement after the mount is installed.
- HORIZONTAL BRACES WITH PAINTABLE COVERS** Make retrofitted installations fast and easy, for both recessed or surface installations.
- EASY TO SERVICE** The mount installs in one piece. Electronics are contained in a single lightweight module that's easily shipped, removed and replaced.

RF Remote Included.
