Product Description: Experience the perfect blend of heirloom-inspired design and modern comfort with the Arbor Swivel Chair from our sophisticated Arbor collection. This chair features a contemporary spin on the classic wing back style, with track arms and a bustle-style back for added flair. Choose from over 130 fabric options, including a wide selection of performance fabrics, to customize your chair to match your decor. With its swivel base and plush poly seat cushion, the Arbor Swivel Chair offers both style and functionality for your living room.

Status: Active

Features: Wing design

Bustle style back

Track arms

Swivel base

Material: Fabric

Frame Construction: Our M upholstered furniture collection pieces are benchmade from sustainably sourced wood and upholstered start to finish by our skilled craftspeople in both North Carolina and Virginia. Every piece has been thoughtfully designed for today's modern lifestyle. Frames are constructed of sustainably certified kiln dried engineered hardwood. Frame parts are joined with precision cut interlocking joints that are glued, stapled to reduce movement, twisting and warping. Frames have cornerblocks that are glued and screwed at stress points, especially on seat rails and other high stress areas. Depending on rail thickness, frames may be of a hybrid construction, adding a solid hardwood inner frame to give seat rails additional support.

Seat Back: Bustle seat back with wings

Seat: Poly Seat Cushion - Tight seats: High resiliency plant-based foam with an overlay of polyester fiber.

Padding: Padded outside arms and back for smoother surface and neater appearance.

Fabric: Choice of over 130 fabrics including a wide selection of performance fabrics

Seating Construction: Seat bases are supported by a sinuous arc metal spring construction. Our springs are made from partially recycled content. Due to the design requirements of some styles, rubberized webbing may be used instead of springs. Double rows of springs are used at the corners for extra support. Seat bases are insulated with polypropylene fabric and are padded with synthetic fiber.
