Type: Chairs, Arm Chairs

Category: Living Room

Collection: Atlas

Motion Type: Stationary

Material: Fabric

Style: Modern/Contemporary

Brand: Modern

Product Description: Airy, chic and contemporary, the Atlas Chair has a track arm design with rectangle bolster pillows in the inside arms and stainless steel metal legs for an off-the-floor aplomb. The modern chair is benchmade from sustainably sourced wood and upholstered by our skilled craftspeople in North Carolina and Virginia, thoughtfully designed for today's lifestyle.

Finish: Stainless steel metal legs

Features: Track arm design

Stainless steel metal legs

Rectangle bolster pillows inside arms

Material: Fabric

Frame Construction: Our M upholstered furniture collection pieces are benchmade from sustainably sourced wood and upholstered start to finish by our skilled craftspeople in both North Carolina and Virginia. Every piece has been thoughtfully designed for today's modern lifestyle. Frames are constructed of sustainably certified kiln dried engineered hardwood. Frame parts are joined with precision cut interlocking joints that are glued, stapled to reduce movement, twisting and warping. Frames have cornerblocks that are glued and screwed at stress points, especially on seat rails and other high stress areas. Depending on rail thickness, frames may be of a hybrid construction, adding a solid hardwood inner frame to give seat rails additional support.

Seat Back: Loose seat back

Seat: Poly Down Blend - High resiliency plant-based foam core, wrapped with a 50/50 down blend cover and enclosed in a down proof ticking.

Fabric: Choice of over 130 fabrics including a wide selection of performance fabrics

Padding: Padded outside arms and back for smoother surface and neater appearance.

COM Fabric Yardage Required 54-Inch Plain: 11

Seating Construction: Seat bases are supported by a sinuous arc metal spring construction. Our springs are made from partially recycled content. Due to the design requirements of some styles, rubberized webbing may be used instead of springs. Double rows of springs are used at the corners

for extra support. Seat bases are insulated with polypropylene fabric and are padded with synthetic fiber.
