## Symbols glossary (TT)

The automatic defrost system works by automatically defrosting at regular intervals eliminating the need to defrost altogether.

Economical mode: Analyzes fridge functioning during the activation and optimizes the operating cycle in order to reduce power consumption.

LED interior lighting: is a more energy efficient and long lasting way of illuminating the interior of the appliance.

Inverter technology: The evolution of Smeg's driers towards more intelligent and environmentally sustainable models has led to the choice of using Inverter technology with heat pumps, which reduces significantly energy consumption.

LED display: to show programmes, functions and options selected and the time to the end of the cycle.

Fast freezing: The fast freezing function brings the temperature of the compartment down when activated a few hours prior to usage.

Life Plus 0°C: The temperature in the Lifeplus compartments is kept at 0°C, which preserves fresh meat and fish longer.

Air plus: keeps food fresher for longer.
