FIRST TIME SETUP

Powering up the System

1. When vehicle power is applied to the system, the POWER and HOME buttons on each monitor will flash RED/BLUE for approximately 12 to 15 seconds and then the buttons will remain solid RED. This is normal and a notification that the system is booting up. Once the POWER and HOME buttons are solid RED, you can press the POWER button to turn on the monitors.

Wi-Fi

1. Press the ⊙ Setup icon to open the Settings Menu.
2. Toggle the WIFI to "ON".
3. Press WIFI to show available networks.
4. Select the WIFI network you would like to connect to and use the touchscreen keyboard to enter the password.
5. Press the green check mark to connect. The system will remember and automatically reconnect to any saved available networks (maximum of 10).

Wireless Headphones

1. To use the wireless headphones, press the ⊙ Setup icon to open the settings menu.
2. Select "IR TRANSMITTER" and toggle the switch to "ON".
3. Select "CHANNEL A" or "CHANNEL B" on each monitor.
4. Set the switch on your wireless headphones to "A" or "B" to listen to that monitor.

Downloading Apps on the System Monitors

1. Select the ▦ apps icon from the main menu.
2. Open the "Play Store" application, preloaded on the system. You will need to create or sign in with your Google account.
3. Browse the Google Play Store and download the applications you wish to the system monitors.

Voxx Link

1. Go to the Google Play Store or iTunes Store and download the free Voxx Link application for your Smart Device.
   Your Smart Device must be connected to the same WIFI network as the System Monitors for the Voxx Link app to function.
2. Press the ⊙ Setup icon to open the settings menu.
3. Select "VOXX LINK" from the menu on the left. This will enable the feature.
4. Open the application on your mobile device and select the monitor you wish to control (example: SB10MD1_xxx). Once selected, the Monitor's screen will display on your mobile device, allowing full control of the Monitor.

NOTE: This Voxx Link application is designed to allow a remote user (ie. Parent) that does not have direct visibility to each monitors to control each monitor.

Scan the QR Codes below to download the Voxx Link application.
