Product Description: Showcase your finest pieces in the Westwood Display Cabinet, featuring two wood-framed glass doors and touch-activated LED lighting. With two adjustable shelves and a Polished Limestone finish on quartered oak veneers, this cabinet offers a sophisticated space for your decor. Ideal for a contemporary dining room, its clean lines and soft finish make it a stunning addition to your home.

Collection Features: Understated and elegant, the Westwood Collection was designed for those who appreciate the finer things in life. Exuding a “quiet luxury” lifestyle, Westwood seamlessly blends minimalist aesthetics with sophisticated comfort. Crafted with quartered oak veneers, the Polished Limestone finish offers a soft hand, adding character and depth to the group. Plated hardware and silver-leaf detailing adds to the soft modern appeal. Designed for those who value subtle sophistication, the whole home collection with coordinating upholstery can easily transform any space into an elegant haven of serenity and style.

Status: New

Features: Two wood-framed glass doors
Touch-activated LED lighting
One fixed bottom wood-framed glass shelf

Two adjustable wood-framed glass shelves
Tapered legs

Material: Oak Veneers and Glass

Finish Construction: Hooker Furniture utilizes a multiple-step finish process of up to 16 finish steps. This results in an unsurpassed clarity, depth and color richness and durability to our finishes. Through hand-craftsmanship such as rubbing and padding, our finishes feel as good as they look, with a smoothness that is delightful to the touch.

Frame Construction: Hooker Furniture uses carefully chosen solid wood and select wood veneers over durable wood products in our furniture construction. Use of veneers enables more decorative looks unattainable with solid wood. Veneers are used over durable wood products such as medium density fiberboard (MDF) and particle board, made of renewable resources. MDF and particle board are used in quality furniture for areas that need to be stable, such as large surfaces. These durable wood products do not expand and contract with heat and cold and do not absorb moisture as much as solid wood, which results in stronger and longer-lasting furniture.
