Segment Dining Table Panther Stone Beige

Striking stone. Solid stance. Segment isn't shy—it leads with shape and lets the materials do the talking. The rounded base cuts into angled segments, giving it that just-right mix of curve and edge. On top, Panther stone brings the drama, with natural veining that makes each piece one of a kind. Bold but grounded, sculptural but easy to live with—this one commands attention without raising its voice.

- Curves Meet Edges: A uniquely angled leg that intersects with the rounded form creates an eye-catching focal point.
- Inviting by Nature: The mid-tone brown wood finish adds an inviting touch, bringing both visual warmth and texture to the space.
- Expressive Panther Stone Marble: This piece is crafted entirely from panther stone marble, showcasing a captivating beige and gold color scheme with unique striations throughout.
