Fhiaba Concept

Fhiaba's wide selection of models for food preservation and wine storage aims to provide fulfillment of the highest expectations in terms of aesthetics and refrigeration technology. Iconic and distinctive style, luxurious stainless steel finishes and professional refrigeration systems are only some of the key factors of the design and development process resulting in the comprehensive range of models which give life to endless possibilities of exclusive personalized refrigeration systems.

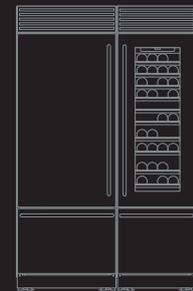

FI24BWR-RGO · FI30Bi-LO · FI30Bi-RO *with glass door accessory

History of Fhiaba

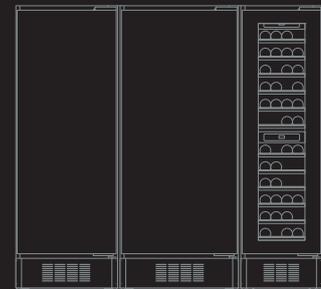

In the early 70's Antonio Baron established Friulinox srl, a manufacturer of ultra-premium, professional refrigeration and complementary cooling products for institutional use in laboratories and medical centers as well as commercial refrigeration for the European luxury restaurant market.

After more than 30 years in the commercial market, The Baron family turns its attention to premium residential refrigeration and Fhiaba is born. The primary objective for Fhiaba is to be the first premium commercial refrigeration company to develop a North American style built-in refrigerator for the home. Where others build residential refrigerators with a commercial look, Fhiaba's goal was to build a refrigerator that encompassed all the key features that have been critical to their professional consumers such as; extremely hygienic interiors, ease of cleaning to remove bacteria, accurate temperature control, extended preservation, extended operating life and durability, and minimal operating noise and vibrations. Fhiaba achieves this in a package that has an attention to detail and a fit and finish that can only be described as the pinnacle of Italian design.

When you buy a Fhiaba, you buy a refrigerator for life!

FI30FCi-LO · FI36RC-RO · FI24WCR-RO

Professional Performance

Fhiaba's refrigeration technology comprises independent cooling systems for each of the compartments, with a continuous and precise electronic system to control temperature and humidity levels.

Fhiaba's ProPerformance technology guarantees an even distribution of the cold air flow, while stainless steel and aluminium minimize the impacts that sudden temperature and humidity changes can have on stored items.

The advanced refrigeration system designed by Fhiaba allows the user to choose settings for each individual compartment, therefore creating the optimum conditions for the finest foods and the most precious wines.

Series StandPlus

The StandPlus Series products offer unmatched freedom of positioning as free-standing or built-in installations thanks to Fhiaba's advanced technical solutions and to its proportioned and elegant design features, which will enhance the finest interiors.

Models from this series are available for food or wine preservation, with two or three separate temperature zones, and in three widths: 36" for food preservation appliances, 24" for wine cellars.

All models are equipped with Fhiaba's TriMode™ bottom drawer.

Models with three separate temperature zones include Fresco drawers in the fridge interior or a dedicated RIserva™ section in wine cellars. Units can be combined to create complete food and wine preservation systems, which can be installed as built-in or in a free-standing configuration removing the need for surrounding cabinetwork or trims.

Models from the StandPlus Series can be combined to create a custom configuration and thanks to their modern and distinctive lines will create elegant and refined surroundings.

Fhiaba Features

TriMode

Fridge, Fresco or Freezer: choose the function of the bottom drawer through Fhiaba Access menu and modify the operating temperature.

This adds flexibility, especially if multiple units are combined in one installation.

Soft closing systems

State-of-the-art mechanisms ensure silent and soft closing of doors and drawers, every time and with the minimal effort.

Shopping

By selecting the Shopping function for the Fridge or TriMode™ drawer, the refrigerator will be ready to accept large quantities of ambient temperature product and quickly bring them to a safe preservation temperature.

Antibacterial interiors

Stainless steel interiors are treated mechanically to reach maximum smoothness and inhibit bacteria growth. Absence of sharp corners and interstices simplifies cleaning, eliminating spots where food debris could be hard-to-reach.

Three layers of protection

Fhiaba Wine Cellars are the only ones featuring a triple-paned bronzed glass door to guarantee maximum protection from UV rays and sudden temperature changes of the external environment.

FP30Bi-LS · FP24Bi-RS

Series X-Pro

The latest addition to the Fhiaba range, X-Pro models can transform any interior into a state-of-the-art professional kitchen, worthy of professional chefs.

The X-Pro design, featuring a heavy-duty top ventilation grille and strong tubular stainless steel handles, has been developed to satisfy requests for a professional-grade kitchen at home, which reflects the highly technological features of the refrigeration system within each Fhiaba.

Models from this series are available for food or wine preservation, in three different widths: 24" for wine cellars and 24", 30" or 36" for food preservation units.

All models are equipped with Fhiaba's TriMode™ bottom-drawer and a large fridge compartment featuring two LowTemp™ stainless steel drawers, dedicated to fresh food preservation, such as fruits and vegetables, dairy, meat and fish.

Fhiaba Features

OptiView™

Two LED arrays light the refrigerator from above, while individual spot lights illuminate distinct areas of the fridge compartment, Fresco and TriMode drawers. LED lights are virtually everlasting with minimum energy consumption.

EvenLift™

EvenLift™ shelves, a standard fitting on all models, can be adjusted at any height of the fridge compartment, thanks to Fhiaba's patented sliding device. Shelves can be rearranged in just a few seconds, without removing them from the fridge or emptying them of their contents.

Anti-Vibration

Full protection from vibration thanks to the effective compressor insulation and by soft closing systems on each and every wooden shelf to protect bottles from shocks.

Ice Cubes Dimensions

Through the Ice Maker menu it is possible to select the dimension of the ice cubes between two sizes: Large or Medium.

Vacation

In order to minimize energy consumption during short vacation periods, activation of the Vacation function is highly suggested. It will limit compressors' work to optimize preservation and consumption. User can select the length of vacation period.

Series Integrated

F130BDW-LGO - F130BDi-RO

For those who prefer a coordinated interior design that showcases a stylish, individual and unique environment, Fhiaba developed the Integrated series. All models are equipped with unique technical solutions which allow for complete integration of the product while maintaining the Fhiaba characteristics of space, functionality and superior design.

Integrated series models are available for both food and wine preservation, with two or three separate temperature zones, in three different widths: 24" for wine cellars, 24",

30" and 36" for food preservation.

Models with three separate temperatures zones include Fresco drawers and one bottom drawer, while models with two separate temperature zones are available with one or two bottom drawers. Single temperature zone models have single door access

All models can be easily combined to give life to customized preservation systems which represent the ultimate solution to various space and design needs.

Fhiaba Features

EquiLance™

Dual-movement patented hinge combines technological innovation and design. Its self-balancing movement guarantees stability and resilience to infinite openings and allows for flush installation of all of Fhiaba's models.

Total No Frost

100% automatic system that eliminates the need for Fridge, Fresco and Freezer manual defrosting. It also allows a quicker return to normal operating temperature thanks to a significant refrigerating speed.

Riserva™

Not a simple wine cooler: thanks to its precise temperature and humidity levels control system, Fhiaba's Riserva compartment is suitable for the preservation and aging of fine red wines.

TriPro™

Two compressors and three evaporators are the heart of Fhiaba's triple refrigeration system which, in combination with compartment separation, guarantees maximum freshness, preserving each food product at dedicated temperatures.

ProVent™

Independent ventilation in each compartment and an even distribution of the cold air flow allow for uniform temperatures ensuring better preservation conditions.

FHIABA PRODUCT WARRANTY
FOR RESIDENTIAL USE ONLY

FULL TWO YEAR TOTAL PRODUCT WARRANTY*

For two years from the original date of purchase, the Fhiaba product warranty covers all parts and labor to repair or replace, under normal residential use, any part of the product proving to be defective in materials or workmanship.

FULL FIVE YEAR SEALED SYSTEM
PRODUCT WARRANTY - PARTS AND LABOR**

For the first five years from the original date of installation, the Fhiaba product warranty will cover all parts and labor to repair or replace, under normal residential use, the compressor, condenser, evaporator, drier and all connecting tubing that prove to be defective in materials or workmanship.

LIMITED TWELVE YEAR SEALED SYSTEM
PRODUCT WARRANTY - PARTS ONLY

For the first twelve years from the original date of installation, the Fhiaba product warranty covers all parts that prove to be defective in materials or workmanship in the sealed system (parts only). The sealed system consists of the compressor, condenser, evaporator, drier and all connecting tubing.

For full details pertaining to the Fhiaba warranty, please refer to www.fhiaba.com

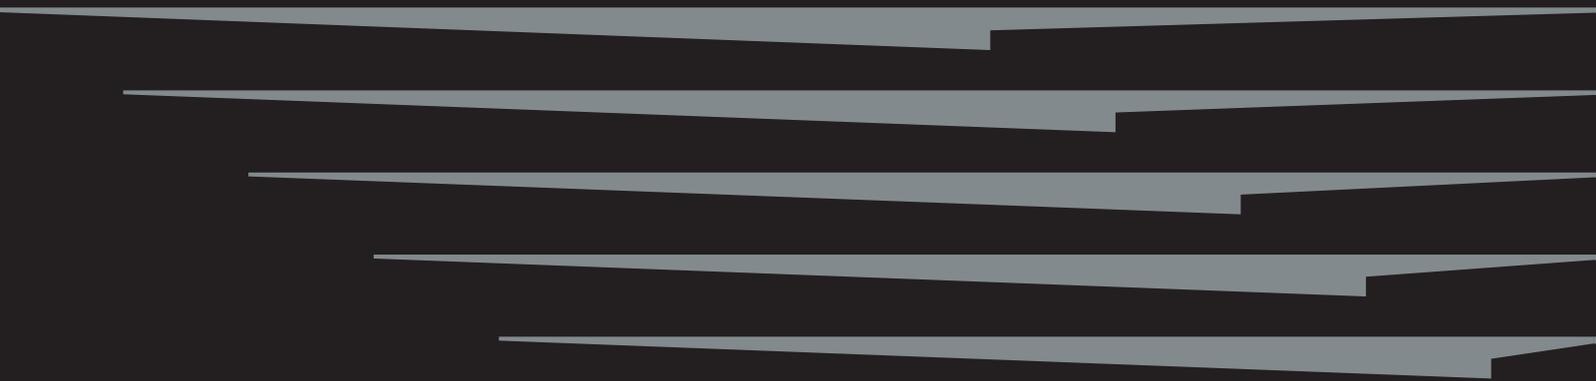

* Stainless steel doors, panels, product frames and interior surfaces are covered by a limited 30-day parts only warranty for cosmetic defects.

**Replacement water filters are not covered by the product warranty.

Fhiaba srl is constantly researching new ways to improve the features and the design of their products, therefore models are often upgraded and reviewed.
