## Elevate Framed Painting

Neutrals meet dimension. Elevate is all about texture, the quiet kind that pulls you in. This abstract landscape blends cool tones with warm greens and beiges, building depth through layering rather than detail. Softly structured and washed in a neutral palette, it brings atmosphere without overwhelm. Minimal in form, but full of feeling, the kind of piece that makes a space feel more lived-in, in the best way.

- Abstract Landscape: An abstract composition that explores the interplay of texture and layering, as cool tones mingle with warm greens and beiges, showcasing subtle variations and delicate details, adding depth and interest to the space.
- Ombre on Canvas: An ombre effect creates a smooth, gradual transition of warm, comforting tones.
