

the **Contour**
Beautiful. Functional. Living.

ergomotion®

The Contour

Treat yourself to a sophisticated sleep experience with the Ergomotion Contour. The Contour is designed to optimize the shape of your mattress when in an elevated position, allowing you to rest more naturally. As the head section raises, the platform expands and moves towards the wall, allowing the mattress to conform to the angle of the base reducing any bridging or compression of the mattress and can provide an easier transition for the stomach. An easy-to-use remote provides access to programmable presets.

The Contour

The Contour is beautiful, aesthetically designed to highlight the separating panels in a minimal but thoughtful fashion. Available with our standard array of features, this base will help you to realize the full potential of an adjustable base while adding a brand new aesthetic to your bedroom.

Built in Massage Therapy

Each of the three intensity levels can be set for 10, 20, or 30 minutes of muscle relaxing bliss.

Interchangeable Accessories

We offer legs in various heights, finishes, and materials allowing you to customize the look and feel of your base.

USB Ports

Our USB Ports are positioned for optimal charging and access to all of your electronic devices.

Design Comes First, Second and Third

Your Ergomotion base fits inside any standard bed frame you choose. It is also designed to beautifully stand on its own.

Wall Saving Feature

Our wall saving technology allows you to stay in place next to your nightstand, even when you raise the head.

Experience Zero G

By elevating your legs above your heart, the Zero G preset will increase circulation throughout your body, raising those pesky problem areas.

Who we are.

At Ergomotion, we lead the adjustable bed industry by continuing to design products that redefine how we enjoy our homes. Adjusting to lifestyle changes, reimagining how we interact with our living spaces, designing products that are truly inventive, providing a level of service that is *the* benchmark in our industry, and making our homes more functionally beautiful. We design to differentiate from the expected. We engineer to innovate. We create to make beauty. We strive to provide support that is second to none. And we are passionately focused on redefining how our lifestyle, and our style, can seamlessly blend to make the very best experiences imaginable.
