

Matte black case with a silver mirrored front.

LED display has four brightness settings (bright/medium/dim/off), and shows the current time, inside temperature, and relative humidity. Optional 12- or 24-hour time display.

Includes a light sensor that automatically dims the display in darkness.

A time projector has three brightness settings (high/low/off) and can be rotated forward and backward 90° in each direction to project time on the ceiling or wall.

Includes an FM radio (76-108 MHz) with automatic channel search and lock functions; 15 levels of volume adjustment (0-90 dB); and a sleep timer of 5-90 minutes.

Dual alarms allow you to wake up to the FM radio or a beep alarm. Repeatable snooze feature (5-60 minutes).

Includes a UL Listed power adapter for powering the clock, a CR2032 backup battery for maintaining clock settings during the loss of power; and a USB charging port that is compatible with all Android and IOS smartphones, tablets, and other digital devices.
