

Lava Stone

Behind the Design

Made entirely from natural composites, lava stone is uniquely crafted from a mix of raw lava dust and a dune sand-based resin binder. A texturally porous material that can absorb moisture, lava stone surfaces are hand-polished and specially sealed with a protective polyurethane wax coating, for use indoors or out.

Care Instructions

- Address spills immediately by wiping with a dry, soft cloth.
- Spot-clean as needed with a soft cloth and mild soap.
- Avoid chemical or bleach-based cleaning products, strong detergents and furniture polish, as abrasive ingredients can damage stone.
- Use coasters, trivets and placemats for protection against wet or hot items.
- Cover when not in use, as prolonged exposure to outdoor elements may cause surface warping or discoloration.
