

EMB10

EMB II SERIES

10" PASSIVE SUBWOOFER

(2) 10" Aluminum Active/10" Aluminum Passive

The latest entry into the EMB II Subwoofer series features a very contemporary cabinet design and a size that isn't obtrusive, which will help blend into the palette of most designers. Built from solid aluminum and powder coated to a fine finish, the exquisite craftsmanship of this powerful subwoofer exudes luxury performance.

Internally the EMB10 utilizes our famous "Energy Multiplying Bandpass" technology to obtain high output and low distortion from a very compact enclosure. Inside the cabinet features a specially designed 10" woofer and pneumatically phase coupled radiator, with aluminum cones and rubber surrounds. The EMB10 subwoofer has been tuned to perform beyond 35Hz, (which is predominantly where most recorded bass frequencies tend to occur) all the way down to 20Hz! Because it is a high-power handling passive subwoofer, we recommend pairing it with our M1000 class D amplifier which provides 1000W of clean power and features a full DSP digital processor. You can power a total of one EMB10 subwoofers with a single M1000 amplifier.

For outdoor/marine applications, order the EMB10M. 70 Volt outdoor/marine version is also available as a EMB10M70.

Size	11.5 w x 11.75 d x 11.5 h (in) 292 w x 298.5 d x 292 h (mm)
Freq Response	20-150Hz \pm 3dB
Impedance	4 ohms
Sensitivity	90dB 2.83V/1m
Woofer	(2) 10" (254mm) Active/Passive
Power req.	500W - 1000W
Enclosure	Aluminum
Finish	Satin Black, Gloss White, Custom allow 2 weeks
