

# Infrared (IR) Splitter: ST-SPL

## Description

Crestron's ST-SPL is a splitter that distributes an IR signal so that more than one IR device can be controlled from a single output port. As shown below, IR input to the unit is connected to the port labeled **IN** via the supplied 6-foot cable with 3.5mm mini-phone plugs at each end. The five ST-SPL output ports (labeled **OUT**) can be connected to any combination of five IR probes (STIRP) and/or Master Blaster IR Sprayers (ST-MB/STI-MB).

The ST-SPL enclosure extends to form mounting flanges at the sides of the unit. There are three holes per flange for installing screws (not supplied) to mount the unit.

**NOTE:** When incorporating the ST-SPL into a Cresnet system, care must be used when programming, since all the devices controlled by a single ST-SPL share the same Serial Mouse Control Driver IR port.

**NOTE:** Crestron devices utilizing this type of port connector include the following: CEN-TVAV, CN-TVAV, CNX-DAPRC, CNX-RMC, CNX-RMCLV, and ST-CP. The ST-SPL may also be connected to the 2-pin type IR port of any Crestron CNX Generation control system using an additional (Crestron part number CNSP-112) cable. For cables for 2-Series control systems, contact Crestron customer service.
