Bias 2 MM Cartridge
A hand assembled moving magnet cartridge which uses a high quality elliptical stylus and parallel wound coils. Housed in Rega's unique, lightweight, rigid cartridge body, the Bias 2 offers a detailed, balanced performance with tight bass and excellent stereo imagery.

Drive Belt Upgrade
The increased drive delivered by the upgrade belt offers greater speed stability and accuracy which adds greatly to the musical performance of the turntable.

100% Wool Mat
A high quality mat manufactured from 100% natural wool. Wool, having stiffer fibres than synthetic man-made materials, directly improves coupling between the platter and the vinyl LP.

Cartridge Protractor
A high quality alignment protractor is included to ensure optimum set-up of your new cartridge.

Only suitable for Planar 2. Not suitable for RP1 or Planar 1 turntable models.
