BUILT-IN REFRIGERATOR COLUMNS
BUILT-IN FREEZER COLUMNS
BUILT-IN WINE COLUMNS

DESIGN GUIDE

1.0

BUILT-IN COLUMNS

These premium refrigerators, freezers and wine columns are masterpieces of design and technology. Their stylish appearance reflects close attention to detail and high-quality materials, inside and out. The stainless steel front and panel ready doors are mounted with state-of-the-art engineered lift-and-swing hinges that give the perception of a weightless range of motion. Versatile installation options make it possible to bring together elegant configurations of the refrigerator, freezer and wine columns in any desired width. All three columns work in harmony with handles and finishes available for every Series.

36” Refrigerator Column Panel Installed
Installation requirements

INSTALLATION

All Bertazzoni columns can be installed in a standard 25” depth cutout.
Finish the edges of the opening because they may be visible when the door is open.
For a built-in installation, to cover gaps between the appliance and the adjacent cabinets, special side profiles are factory-installed and covering frames are provided with the product.

For instructions of product combinations please see the Multiple Installation Section (page 58).

CABINET REQUIREMENT

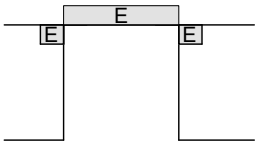
Installation of the appliance must be performed in accordance with the provisions of applicable legislation.
Be sure that support of this appliance is perpendicular to the front facing of the wall or cabinet before you perform the installation.
The floor must be flat and must be capable of supporting the weight of the appliance when in use.

Required floor support	1532 lb (695 kg)

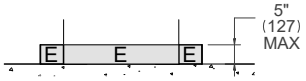
ELECTRICAL REQUIREMENT

The installation must comply with all applicable electrical codes.
A properly - grounded horizontally - mounted electrical receptacle should be installed.
Place the electrical supply flush with the back wall and within the shaded area shown in the illustrations.
Placement within the opening may require additional cabinet depth.

TOP VIEW



FRONT VIEW



A separate circuit breaker servicing only this appliance is recommended.

Electrical supply	115 V 60 Hz 218 W 2 Amp
Service	15 Amp dedicated circuit

PLUMBING REQUIREMENTS

Bertazzoni Freezer Columns are provided with a water filter assembly which must be mounted outside the unit.
The appliance must be connected only to a potable water supply system.
To connect to water supply system (for appliances equipped with ice maker) a ¼” waterline with accessible shut-off valve must be supplied.
The solenoid connection on the appliance is ¾” diameter but is metric threaded (NPT).
The system pressure must be between from 8 PSI to 75 PSI (between 0.5 bar and 5 bar). Different pressures can cause malfunctions or leaks in the water system.
For information on how to purchase the water filter, please see Use and Maintenance Manual.

For detailed installation specifications consult the multiple installation requirements page or each single product installation manual.

For a built-in installation, to cover gaps between the appliance and the adjacent cabinets, special side profiles are factory-installed and covering frames are provided with the product.
For panel ready columns, do not exceed the maximum weight of 75 pounds (34 kg) for door panel. Panel can have thickness ranging between ¾” (18 mm) and 1 1/8” (28 mm).

For instructions of product combinations please see the Multiple Installation Section (page 58).

CABINET REQUIREMENT

Installation of the appliance must be performed in accordance with the provisions of applicable legislation.
Be sure that support of this appliance is perpendicular to the front facing of the wall or cabinet before you perform the installation.
The floor must be flat and must be capable of supporting the weight of the appliance when in use.

Required floor support	694 lb (315 kg)

ELECTRICAL REQUIREMENT

The installation must comply with all applicable electrical codes.
A properly - grounded horizontally - mounted electrical receptacle should be installed.
Place the electrical supply flush with the back wall and within the shaded area shown in the illustrations.
Placement within the opening may require additional cabinet depth.

TOP VIEW

FRONT VIEW

A separate circuit breaker servicing only this appliance is recommended.

Electrical supply	115 V 60 Hz 327 W 3 Amp
Service	15 Amp dedicated circuit
Power Connection	NEMA 5-15P with 79” power cord

PLUMBING REQUIREMENTS

Bertazzoni Freezer Columns are provided with a water filter assembly which must be mounted outside the unit.
The appliance must be connected only to a potable water supply system.
To connect to water supply system (for appliances equipped with ice maker) a ¼” waterline with accessible shut-off valve must be supplied.
The solenoid connection on the appliance is ¾” diameter but is metric threaded (NPT).
The system pressure must be between from 8 PSI to 75 PSI (between 0.5 bar and 5 bar). Different pressures can cause malfunctions or leaks in the water system.
For information on how to purchase the water filter, please see Use and Maintenance Manual.

For detailed installation specifications consult the multiple installation requirements page or each single product installation manual.

HANDLE INSTALLATION ON CUSTOM PANELS

In case a custom panel is to be mounted on any of the models listed below with Bertazzoni handles,it will be necessary to install M5 x 0.8 mm brass tapping inserts in order to secure the handle properly on the custom panel.
Recommended drill bit size to drill the pilot hole is 3/8".
Suitable inserts can be ordered at **www.encompassparts.com**

Part Number: 95631A100, contains n°4 M5 brass hardwood inserts and 1 M5 installation bit.
Do not use a power tool to mount the inserts. Installation of the inserts with improperly calibrated power tools risk damaging the panels.

Dimensions in parentheses are millimeters unless otherwise specified.

Toekick Panel
