### INFRARED SIZZLE ZONE™ SIDE BURNER

Heats up to 1800°F in less than 30 seconds for steakhouse-quality sears and fast meals.

### PORCELAINIZED CAST IRON ICONIC WAVE™ COOKING GRIDS

Rust resistant grids that provide even heat with Napoleon's signature WAVE™ design. Waves prevent food from falling through grates and provide distinctive sear marks.

### SPACE SAVING

Easy-to-use folding side shelf with integrated tool hooks allow this grill to be tucked out of the way for storage or fit into compact spaces, ideal for balconies, townhomes and small patios.

### INSTANT JETFIRE™ IGNITION

Enhanced one-spark technology with cross over lighting for reliable, quick, and easy ignition.

### STAINLESS STEEL BURNERS

Durable construction provides long life while helping to cook food quickly over even heat.

### STAINLESS STEEL SEAR PLATES

Offer long-lasting performance so you can continue to cook with confidence.

### WARMING RACK

Increases cooking space and ensures every part of your meal can be served at the perfect temperature.

## TRANSFORM YOUR GRILL

Effortlessly convert your grill with our Premium Stainless Steel Griddle Insert. Ideal for searing, sautéing, and stir-frying, this griddle offers a generous cooking surface and provides ample space to cook with ease. Achieve an epic sear on steaks, cook juicy burgers, full breakfasts, and more. Enjoy a reliable cooking experience thanks to thick stainless steel construction and even heat distribution, plus the integrated grease traps capture drippings for easy cleanup. Save space and money, convert your existing grill into a griddle in a snap.

# HOW DOES INFRARED COOKING WORK?

Infrared technology is innovative, using radiant energy similar to the sun. Low-frequency waves from the invisible part of the light spectrum travel from the infrared burner directly to your food without heating the surrounding air.

Napoleon infrared burners are designed with ceramic tiles with thousands of evenly spaced flame ports which heat up the ceramic up to a sizzling 1800°F in seconds, producing radiant infrared energy. This intense heat, or **SIZZLE ZONE®**, quickly sears your food, locking in moisture and flavor.

The results? Delicious, juicy meals in less time so whipping up the perfect meal is quick and easy every time.

## GREAT FLAVOR AND MOISTURE RETENTION

Radiant energy is delivered directly to the food, not the air so it cooks quickly, resulting in a greater retention of food weight.

## MORE EFFICIENT

As infrared heats food directly, not the air around it, grilling year round is much easier.

## THE ENVIRONMENTAL CHOICE!

Cooking your food with Napoleon's advanced infrared technology can reduce your gas consumption by up to 50%.

BTU Consumption

Traditional Grilling

Napoleon Infrared Grilling

# READY-TO-GRILL IN 30 SECONDS

## COOK THE PERFECT INFRARED STEAK.

1. Bring steak to room temperature, pat dry and season generously with salt and pepper.
2. Preheat your infrared burner for about one minute.
3. Place your steak on the preheated grid.
4. Sear for 1-2 minutes, turn 90-degrees and continue searing for 1-2 minutes.
5. Remove and rest for a rare to medium rare steak or continue cooking using indirect heat on your main grill head to the perfect doneness.

TIP: Choose a steak that is well-marbled; the more marbled it is inside, the more flavorful and tender your steak will be. A perfect steak size is about 1 ½ to 2 inches thick and 12 to 16 ounces.
