- The range hood should be mounted at a minimum distance of 24" (610mm) above the cooking surface for safety and optimum performance.
- **Note:** Bottom hinges should be installed at 9" or more above the cabinet base.

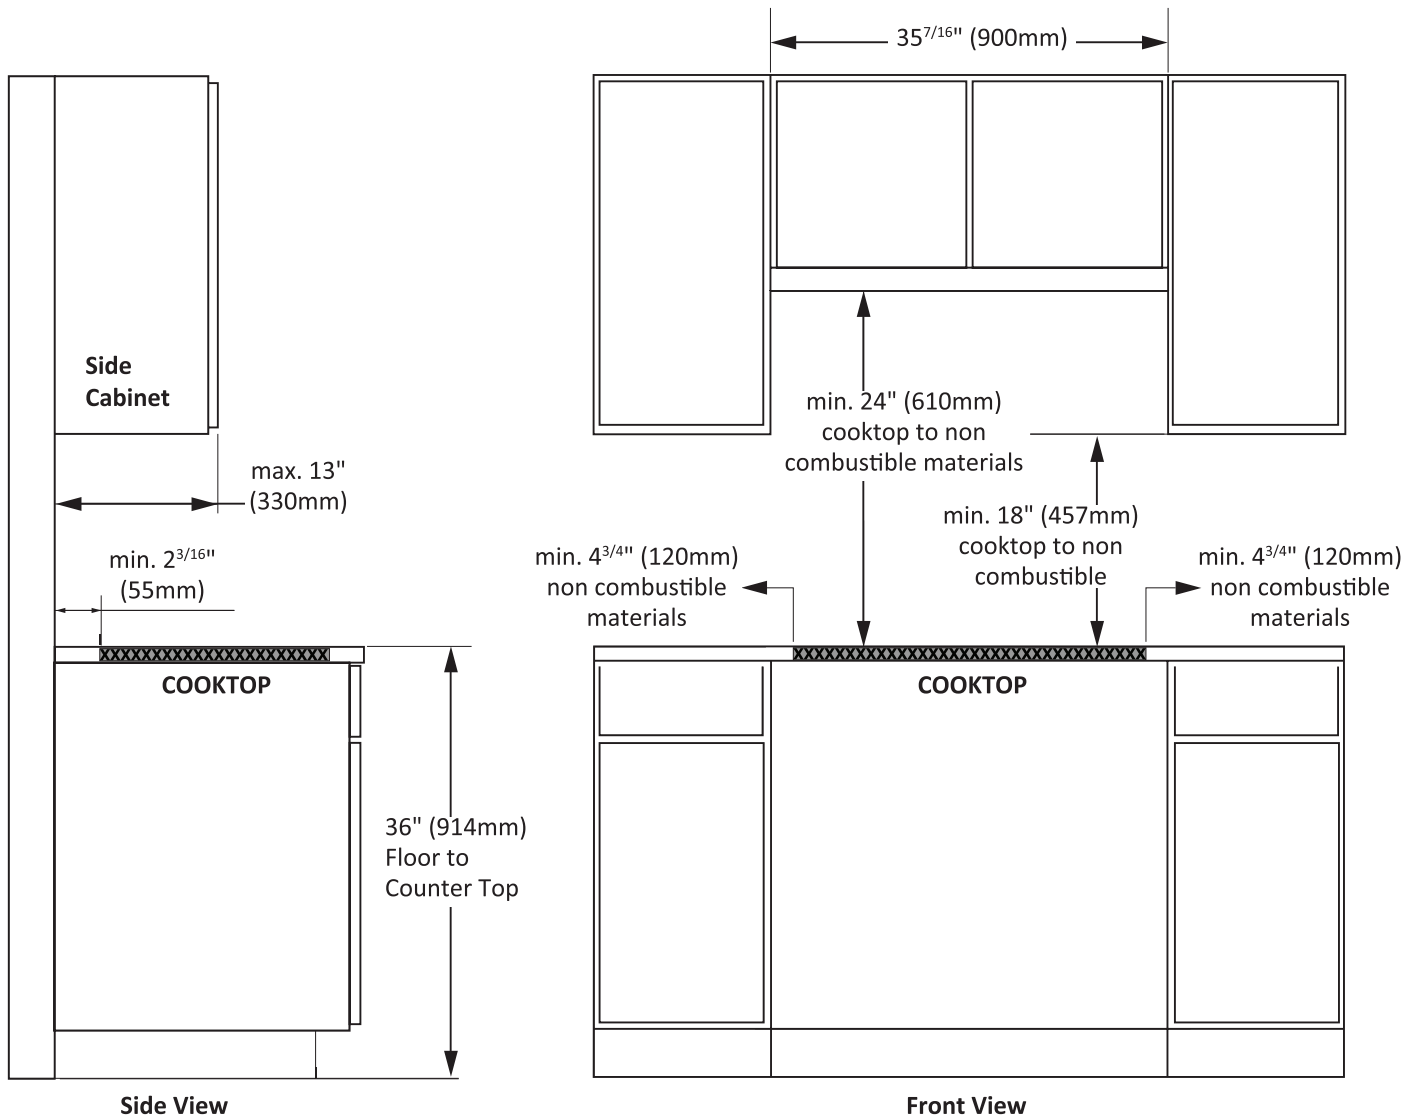

- To install the hood with a duct, you will need to provide a hole for the duct. Please use the template provided to correctly place the hole.

- Use the diagram below for correct placement of ductwork and electrical cutout in cabinets.

- **Note:** Installation based on 5/8" wide cabinet gables.

## Recommended Cabinet Minimum Clearance From Cooking Surface

**\*Follow local building codes for clearance requirements.\***
