Air extraction/recirculation

- Classic design, high performance
- Highly efficient patented rim extraction
- Planed and easy to clean underside with covered filters
- Air extraction or recirculation system
- Dimmable Soft-Light

Output

Unobstructed air flow. Maximum air output 460 CFM.
Sound pressure level with DN 150:
Air recirculation 73 dB.

Features

3 electronically controlled output levels.
Intensive mode.
Interval ventilation.
Delayed shut-off function
Grease filter saturation indication by flashing light
Rim extraction filter, dishwasher-safe.
Dimmable halogen Soft-Light 3 x 20 W.
Glass cover.

Planning notes

For calculating the exhaust air line go to Rodun online at www.gaggenau.com.
For maximum duct lengths use Gaggenau flat rectangular ducts AD 8... or Naber-System Compair flow. Other flat ducts are not permitted!
When installing a ventilation hood with air extraction mode and a chimney-vented fireplace, the hood's power supply line needs a suitable safety switch.
A large drop in output and significantly increased noise can be expected in the air recirculation mode in case of ventilation hoods with a very high air output.
Vario cooktops with intensive production of vapours like VR/VP/VF should be placed in the middle beneath the cooker hood (in this case air recirculation is not recommended).
Clearance above gas appliances min. 30".
Clearance above electric appliances min. 30".
Side outlet possible no lower than 21 2/3" from the bottom edge of the hood (pipe middle).
Plan the socket concealed behind ventilation duct.
Weight 52 to 88 lb.
Recommendation for stainless steel parts positioned nearby that have to be welded and polished: brushed grain 280.
Surfaces: Stainless steel 1.4016, ground and brushed IIIC.
The dimensions of the air ducts refer to a distance of 63" from the floor to the bottom edge of the hood.
Convert for other installation heights:
Worktop height + minimum clearance + hood with duct cover.

Rating

Total connected load 380 W.
Connecting cable 30" with plug.
