

T24IW102SP

24-INCH BUILT-IN WINE PRESERVATION COLUMN WITH STORAGE

FREEDOM® COLLECTION, PANEL-READY

FEATURES & BENEFITS

- ★ - Panoramic glass door, premium black stainless steel interior, Magnum capacity SoftClose™ racks, and diamond acacia wood dowels, delivering both refined aesthetic, stability, and superior wine preservation
- Stunning full side wall LED lighting lets you personalize zones to spotlight center bottles, dim surroundings, or create a full-glow display visible through the glass door
- ★ - 7 master sommelier crafted presets in 3 zones for optimal preservation of whites, reds, desserts, sparkling, or rosé, customizing each zone for your collection
- ★ - Full-extension smoothglide racks are designed to hold magnum and standard bottles on any same shelf, so your wine is impeccably organized for grand occasions
- ★ - Flexible racking system provides exceptional bottle capacity & storage for standard and magnum bottles, accommodating up to 110 bottles
- ★ - Solid acacia diamond dowels and SoftClose™ racks cradle bottles, minimizing vibration to protect the wine
- Effortlessly control temperature, lighting, & other settings on a vibrant LCD touchscreen, ensuring easy access for your convenience or control remotely through our Home Connect® App

FREEDOM® COLLECTION, PANEL-READY

FLUSH INSTALL CUTOUT DIMENSIONS

Measurements in inches (mm)

- A: Socket
- B: Area for water and electric line routing
- C: Furniture return
 - C1: Frameless cabinet
 - C2: Framed cabinet
- D: Filler

PLANNING NOTES

Depth: The wine preservation column is fully flush integrated when installed in a 25" (635mm) deep cabinets with a typical panel thickness of 3/4" (19mm). Recess depth depends on kitchen design and panel thickness.

Electrical Supply: The electrical supply outlet (A) is recommended to be located in an adjacent cabinet for safety and serviceability. If it is not possible due to the construction to connect the appliance to a power outlet next to it (A), connect the appliance to a power outlet behind the appliance (B). This alternative position of the power outlet is permissible only if you can switch off the outlet with a circuit breaker in the fuse box.

Water Supply: A cold water connection is required for appliances that feature an ice maker or an ice and water dispenser. Water pressure must be between 40 and 120 p.s.i. A separate shut-off valve must be installed for the appliance water connection. The shut-off valve for the water connection may not be behind the appliance. It is recommended to place the shut-off valve outside the cutout next to the appliance or in another easily accessible location. When installing the water connection, observe the permitted installation areas for the water supply line.

Furniture Return: The interior sides of the furniture return (C) will be partially visible when the refrigerator door is opened. Top and side returns should be finished to match the exterior furniture at a minimum depth of 4" (102 mm). Ensure that the side walls of the cutout (C) are completely flush to a depth of at least 4" (102 mm).

FLUSH INSTALL TOP VIEW CLEARANCES

Measurements in inches (mm)

A: Panel

PLANNING NOTES

Door Panels & Handles: Clearance dimensions are based on a door panel (A) thickness of 3/4" (19mm). Additional clearances must be added for handles and door panels thicker than 3/4" (19mm).

Clearance Requirements: The required clearances for the maximum door opening angle of 115° should be followed. The minimum required clearance to fully access all compartments is 90° door opening (B).
