

The new **KIN Flex** handles more power, plays deeper, and is unbelievably even easier to place. While similarities undoubtedly remain, everything from the drivers, crossover topology and cabinet dimensions are different. Use a trio of **KIN Flex** under a TV, perhaps as rear effects in an Atmos system, or pair them with the **KIN Amp** and **KIN Sub** and marvel at how a system so small can sound so big.

kinbytotem.com

KIN Flex is equipped with a 1" titanium injected soft dome tweeter. The soft dome material exhibits characteristic smoothness while the added titanium element imparts highs that are detailed, airy, and extraordinarily lifelike.

The customized 4" Natural Hybrid woofer is composed of paper for its acoustic advantages and treated with a polymer to reinforce its strength and increase its lifespan. Bass is powerful, fast, and musical.

KIN Flex is a sealed cabinet design. Whether wall mounted or placed on a tabletop, it virtually performs the same. Perfect phase means that whether placed high or low, KIN Flex will always provide Totem's three dimensional, almost holographic sound stage.

KIN FLEX
