## Frida Outdoor Dining Table Cream

Textured, tapered, totally patio-worthy. Frida brings the look of plaster outdoors. The hand-finished concrete top has that layered, tonal look—softened by a rounded bullnose edge for a more sculptural feel. Below, a bold pedestal base keeps the silhouette clean and grounded. Sculptural, substantial, and ready for the spotlight.

- Hand-Textured Concrete Finish: Meticulously hand-textured to mimic the appearance of Venetian plaster, giving it a unique, artisanal look that adds depth and character.
- Soft Bullnose Edge: A smooth, rounded bullnose edge softens the concrete's appearance, creating a more inviting and comfortable surface for dining and entertaining.
