

Tweeter Installation

Tweeters should be positioned high, preferably at ear level. Optimum performance will be obtained when tweeters are angled toward the listener. The included angled mount is an easy way to achieve this when door or dash mounting a tweeter.

Angle Mount

When the surface you are mounting your tweeter to points away from the listener, use the included angle mount to direct the sound back towards the listener.

Flush Mount

The best conspicuous tweeter mounting option is a flush mount. The recessed design provides superior protection for the tweeter and it blends with the interior of your vehicle.

Surface Mount

When there is inadequate depth available for flush mounting, the surface mount option provides a convenient mounting solution.
