INSTALLATION SPECIFICATIONS Mounting Details

- · Center unit over cooking surface
- Distances "S" is determined by the cooking surface. See "Distance between cooktop and hood (S)" dimensions.
- If studs are not available in the required locations, a plywood backing (min. 1/2" (13 mmm)) **MUST** be used to reinforce support. Reinforcing material should be affixed to structural wall members. Failure to adequately support the weight as stated may result in the ventilation system falling off the wall, causing personal injury and property damage.

Reducing Collar (Optional Accessory)

If you would like to reduce the environmental impact of your ventilation system by limiting the CFM output the Reducing Collar can be installed. It reduces the air flow to less than 400 CFM. Check local building codes for maximum CFM requirements.
