Under Cabinet - Glide Out

XOC - MUA make-up air compliant series

The XOC may look like other minimal profile range hoods but that is where the similarity ends. This powerful, versatile unit glides flush with your cabinets to reveal only a thin stainless steel band when closed but unlike other systems, the blower and lighting are fully functional whether or not the expanded filter slide is open or shut. One more practical and beautiful innovation from XO.

What does Make-Up Air Compliant mean?

For the last several years, codes and standards required Make-Up air for domestic range hoods with exhaust rates exceeding a certain limit.

The International Residential Code Section M1503.4 and the International Mechanical Code Section 505.2 require Make-Up air for all domestic range hoods in excess of 400 cfm.

State, county and local codes may be more restrictive. Always check with your jurisdiction for specific Make-Up air requirements in your area.
