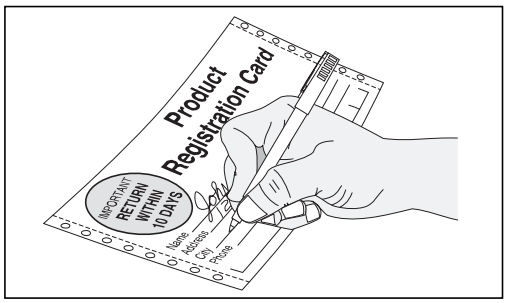
PRODUCT REGISTRATION



The information contained in this Use and Care Guide will instruct you on how to properly operate and care for your product. Please read through the information contained in your literature pack to learn more about your new freezer.

Record your Model and Serial Numbers

Record the model number and serial number of this freezer in the space provided below.

Model No. _____

Serial No. _____

Register Your Product

The self-addressed **PRODUCT REGISTRATION CARD** (shown above) should be filled in completely, signed and returned to Crosley Corporation.

This Use and Care Guide provides operating instructions for your model. Use your freezer only as instructed in this Use and Care Guide.

IMPORTANT SAFETY INSTRUCTIONS

Read all instructions before using this freezer.

WARNING **For your safety**

Do not store or use gasoline or other flammable vapors and liquids in the vicinity of this unit or any other appliance. Read product labels for flammability and other warnings.

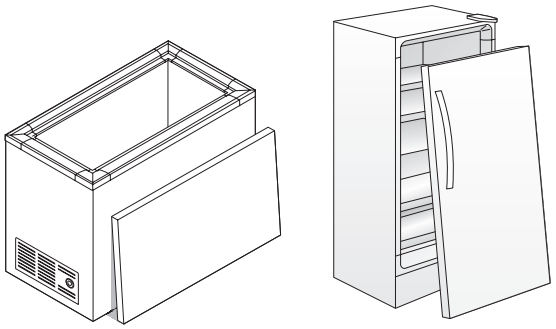
WARNING **Child Safety**

- Destroy carton, plastic bags, and any exterior wrapping material immediately after the freezer is unpacked. Children should never use these items for play. Cartons covered with rugs, bedspreads, plastic sheets or stretch wrap may become airtight chambers and can quickly cause suffocation.
- A child might suffocate if he crawls into the freezer to hide or play. Remove the door/lid of the freezer when not in use, even if you plan to discard the freezer. Many communities have laws requiring you to take this safety precaution.
- Remove or discard any spacers used to secure the shelves during shipping. Small objects are a choke hazard to children.

WARNING **Risk of Child Entrapment**

Child entrapment and suffocation are not problems of the past. Junked or abandoned refrigerators or freezers are still dangerous – even if they will sit for “just a few days”. If you are getting rid of your old refrigerator or freezer, please follow the instructions below to help prevent accidents:

- Remove the door/lid. If your door has electronic controls, have it removed by a qualified technician.
- Leave shelves in place so children may not easily climb inside.
- Have the refrigerant removed by a qualified technician.



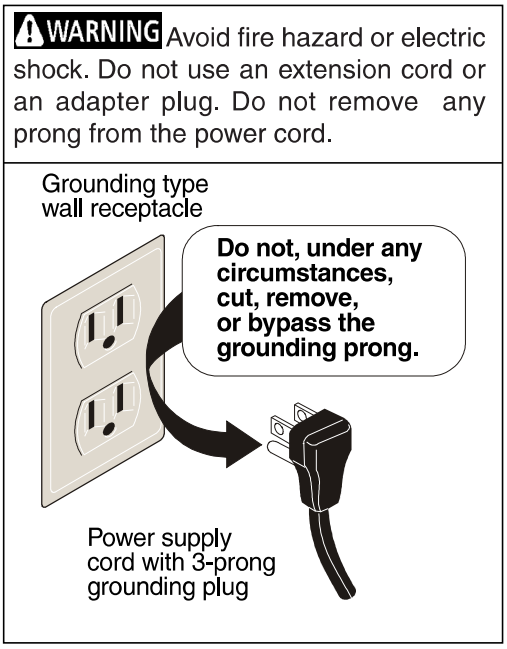
⚠ WARNING ELECTRICAL INFORMATION

These guidelines must be followed to ensure that safety mechanisms in the design of this freezer will operate properly.

- Refer to the serialplate for correct electrical rating. The power cord of the appiiance is equipped with a three prong plug for your protection against shock hazards. It must be plugged directly into a properly groundedthree prong receptacle, protected with a 15 amp timedelay fuse or circuit breaker. The receptacle must be installed in accordance with local codes and ordinances. Consult a qualified electrician. Receptacles protected by Ground Fault Interrupters (GFI) are **NOT RECOMMENDED. DO NOT USE AN EXTENSION CORD OR ADAPTER PLUG.**
- If voltage varies by 10% or more, freezer performance may be affected. Operating freezer with insufficient power can damage the motor. Such damage is not covered under the warranty. If you suspect your household voltage is high or low, consult your power company for testing.
- To prevent the freezer from being turned off accidentically, do not plug unit into an outlet controlled by a wall switch or pull cord.
- Do not pinch, knot, or bend the cord in any manner.

OTHER PRECAUTIONS

- To defrost freezer, always unplug unit first.
- Never unplug the freezer by pulling on the cord. Always grip the plug firmly, and pull straight out from the receptacle.
- Turning the temperature control to OFF turns off the compressor, but does not disconnect the power to the light bulb or other electrical components.

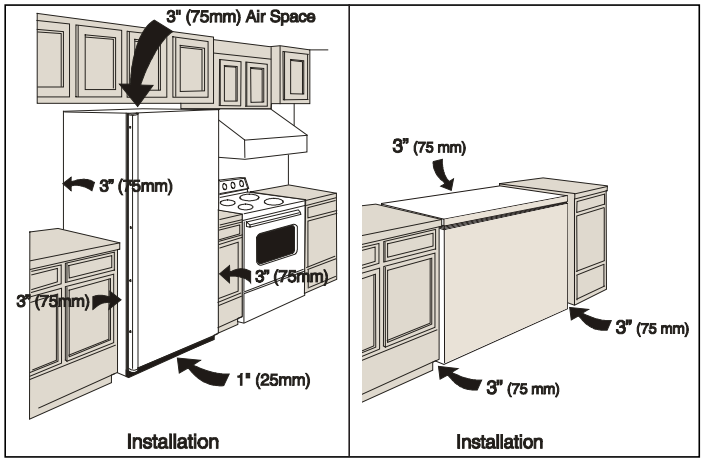


FIRST STEPS

This Owner's Guide provides specific operating instructions for your model. Use the freezer only as instructed in this Owner's Guide. **Before starting the freezer, follow these important first steps.**

INSTALLATION

- Choose a place that is near a grounded electrical outlet. **Do Not use an extension cord or an adapter plug.**
- For the most efficient operation, the freezer should be located where surrounding temperatures will not exceed 110°F (43°C). Temperatures of 32°F (0°C) and below will NOT affect freezer operation. Additional compressor heaters are not recommended.
- *Allow space around the unit for good air circulation.* Leave a 3 inch (75 mm) space on all sides of the freezer for adequate circulation.

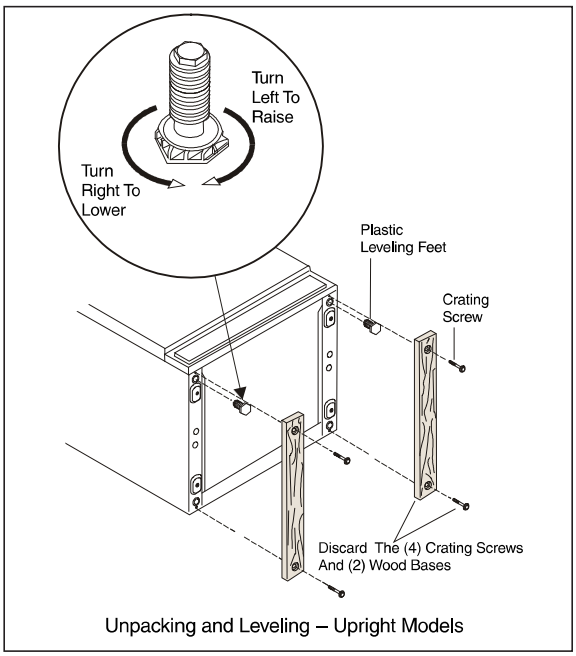


NOTE: The exterior walls of the freezer may become quite warm as the compressor works to transfer heat from the inside. Temperatures as much as 30° F warmer than room temperature can be expected. For this reason it is particularly important in hotter climates to allow enough space for air circulation around your freezer.

LEVELING

The freezer must have all bottom corners resting firmly on a solid floor. The floor must be strong enough to support a fully loaded freezer. **NOTE:** It is **VERY IMPORTANT** for your freezer to be level in order to function properly. If the freezer is not leveled during installation, the door may be misaligned and not close or seal properly, causing cooling, frost, or moisture problems.

To Level Upright Models:
After discarding crating screws and wood base, use a carpenter's level to level the freezer from front-to-back. Adjust the plastic leveling feet in front, ½ bubble higher, so that the door closes easily when left halfway open.



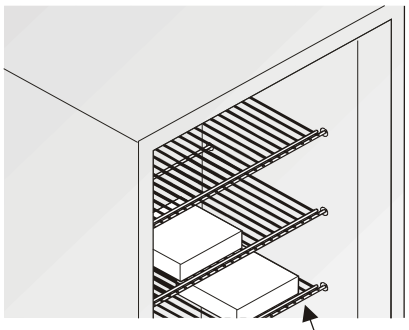
Unpacking and Leveling – Upright Models

To Level Chest Models:
If needed, add metal or wood shims between foot pads and floor.

CLEANING (PRIOR TO USE)

- Wash any removable parts, the freezer interior, and exterior with mild detergent and warm water. Wipe dry. **Do not use harsh cleaners on these surfaces.**
- Do not use razor blades or other sharp instruments, which can scratch the appliance surface when removing adhesive labels. Any glue left from the tape can be removed with a mixture of warm water and mild detergent, or touch the residue with the sticky side of tape already removed. **Do not remove the serial plate.**

⚠ CAUTION To allow door to close and seal properly, DO NOT let food packages extend past the front of shelves.



DOOR REMOVAL (NON-ELECTRONIC MODELS)

If door must be removed:

1. Gently lay freezer on its back, on a rug or blanket.
2. Remove two base screws and base panel.
3. Remove bottom hinge screws.
4. Remove plastic top hinge cover.
5. Remove screws from top hinge.
6. Remove top hinge from cabinet.
7. Remove door and bottom hinge from cabinet.
8. To replace door, reverse the above order and securely tighten all screws to prevent hinge slippage.

DOOR REMOVAL (ELECTRONIC MODELS)

If door must be removed:

- Door hinge is fastened with tamper-proof screws. Please have a qualified technician remove the door.

ENERGY SAVING TIPS

- The freezer should be located in the coolest area of the room, away from heat producing appliances or heating ducts, and out of direct sunlight.
- Let hot foods cool to room temperature before placing in the freezer. Overloading the freezer forces the compressor to run longer. Foods that freeze too slowly may lose quality or spoil.
- Be sure to wrap foods properly, and wipe containers dry before placing them in the freezer. This cuts down on frost build-up inside the freezer.
- Freezer shelves should not be lined with aluminum foil, wax paper, or paper toweling. Liners interfere with cold air circulation, making the freezer less efficient.
- Organize and label food to reduce door openings and extended searches. Remove as many items as needed at one time, and close the door as soon as possible.

SETTING THE TEMPERATURE CONTROL

COOL DOWN PERIOD

- For safe food storage, allow 4 hours for the freezer to cool down completely. The freezer will run continuously for the first several hours. Foods that are already frozen may be placed in the freezer after the first few hours of operation. Unfrozen foods should NOT be loaded into the freezer until the freezer has operated for 4 hours.
- When loading the freezer, freeze only 3 pounds of fresh food per cubic foot of freezer space at one time. Distribute packages to be frozen evenly throughout the freezer. It is not necessary to turn the control knob to a colder setting while freezing food.

TEMPERATURE CONTROL

Electromechanical Temperature Control (Chest and Some Upright Models)

The electromechanical temperature control is located inside the freezer on upright models, and on the left exterior wall on chest models (see figure 1). The temperature is factory preset to provide satisfactory food storage temperatures. However, the temperature control is adjustable to provide a range of temperatures for your personal satisfaction. To adjust the temperature setting, turn the temperature control knob clockwise or counter clockwise. Allow several hours for the temperature to stabilize between adjustments.

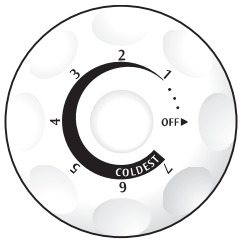


Figure 1

Standard Electronic Temperature Control (Some Upright Frost Free Models)

The standard electronic temperature control is located outside the freezer (see Figure 1). Temperature is factory preset to provide satisfactory food storage temperatures. To adjust the temperature setting, move the UP (^) symbol for colder temperatures and DOWN (v) symbol for warmer temperatures on the control panel. Allow several hours for the temperature to stabilize between adjustments.

To turn off freezer, press DOWN (v) symbol until display shows "1". Press three more times until display shows "0". To activate freezer, press UP (^) three times until display shows "1" then press (^) to desired setting.

Standard Electronic Temperature Control
Figure 1

To keep the temperature setting from being accidentally changed, the control may be locked. This is done by pressing "Alarm Reset" for 3 seconds. "L" will then appear on display. To unlock the control, press "Alarm Reset" for 3 seconds. For the first second, "U" will appear, and then the current temperature will appear.

- Temp Alarm

  This feature is designed to provide a warning if the inside temperature exceeds 23°F. "HI TEMP" feature operates on household electricity. It will not function if household electricity is interrupted.

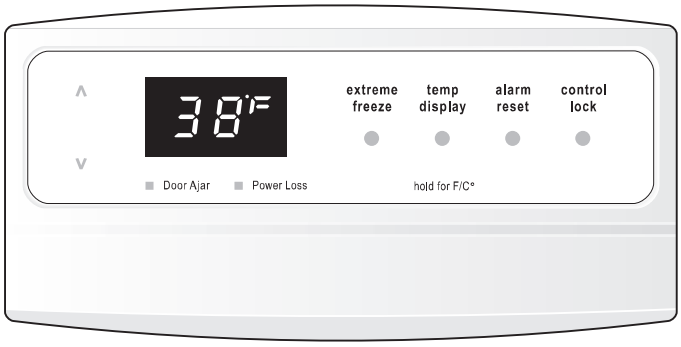
- When the freezer is initially plugged in, the red "HI TEMP" indicator will be on and the buzzer will sound. The indicator light will stay on until the freezer temperature is below 23°F. To silence the buzzer, press the ALARM RESET button.
- If a malfunction causes the temperature inside the freezer to rise above 23°F, the "HI TEMP" light will turn on and the buzzer will sound. The buzzer will sound every five minutes until the freezer temperature is below 23°F. To silence the buzzer, press the ALARM RESET button.
- Door Ajar Alarm

  This feature provides a warning if the the door is open for more than five minutes. There will be a beep every five seconds and the "Door Ajar" indicator will light up. Press "Alarm Reset" to turn the alarm off. The "Door Ajar" indicator will remain lit unril the door is closed. If the door remains open for 15 minutes or more, the interior lamp will turn off.

Should an "E" appear on display, contact your authorized service technician for repair. Until changes are made, freezer will continue to run.

Deluxe Electronic Temperature Control (Some Upright Frost Free Models)

Refer to the Electronics Control Guide supplied when you purchase a deluxe electronic upright model. See Figure 3 for deluxe electronics control panel.

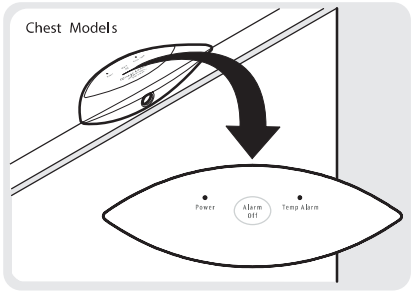


Upright Models
Figure 3

Temp Alarm (ELECTRONIC models)

This feature is designed to provide a warning if the inside temperatures reach an unsafe level. The Temp. Alarm Feature operates on household electricity. It will not function if household electricity is interrupted.

When the freezer is initially plugged in, the red Temp. Alarm Indicator Light blinks. The indicator light will continue to blink until the freezer has reached a safe freezing temperature. If a malfunction causes an unsafe temperature inside the freezer, the red light will blink and the buzzer will sound. To silence the buzzer, press the ALARM OFF button. The Indicator Light will continue to blink until a safe freezing temperature is again reached. If the problem is not resolved within 12 hours, the buzzer will turn on again. If the ALARM OFF button is not pressed, the buzzer will turn itself off automatically after 48 hours, but the red Temp Alarm Light will continue to blink.



FREEZER OPTIONAL FEATURES

NOTE: Your freezer may have some, or all of the features listed below. Become familiar with these features, and their use and care.

SECURITY LOCK WITH POP-OUT KEY

This security lock fastens the door snugly, ensuring stored food is secure. To lock or unlock the freezer, push the key into the lock and turn. The key pops out of the lock after it has been turned.

SLIDE-OUT BASKET (SOME UPRIGHT MODELS)

A Slide-Out Basket (some models), located at the bottom of the freezer, provides separate storage space for items that are difficult to store on freezer shelves. To remove the basket, pull out and lift up.

INTERIOR LIGHT

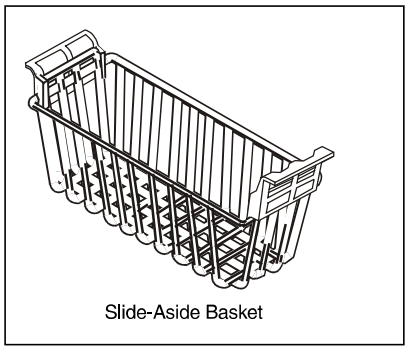
The light comes on automatically when the door is opened. To replace the light bulb, turn the temperature control to OFF and **unplug the electrical cord.** Replace the old bulb with a bulb of the same wattage.

ADJUSTABLE SHELF (SOME UPRIGHT MODELS)

This shelf can be moved to one or two positions. Lift the shelf up and out to move to the desired location.

SLIDE-ASIDE BASKET (SOME CHEST MODELS)

This basket helps organize odd-shaped items. To reach other packages in the freezer, slide the basket aside, or lift out.



Slide-Aside Basket

FAST FREEZING SHELVES (MANUAL DEFROST UPRIGHT MODELS)

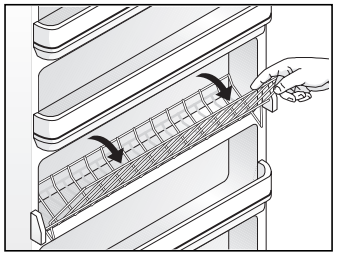
These shelves contain cooling coils to freeze foods quickly and allow cold air to constantly circulate throughout the freezer. Do not use sharp metal objects such as ice picks or scrapers to clean the shelves. This could damage the shelves and reduce their cooling ability. These shelves are not adjustable.

TILT-OUT SHELF (SOME UPRIGHT MODELS)

This shelf is located inside on the freezer door and provides additional storage space. To access an item, tilt the top of the “basket” shelf down.

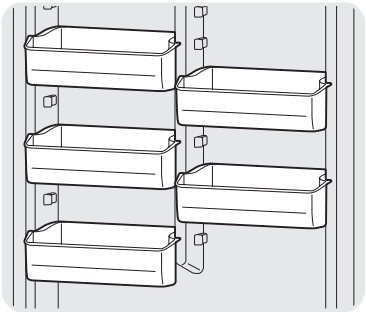
TILT-OUT SHELF (SOME UPRIGHT MODELS)

This shelf is located inside on the freezer door and provides additional storage space. To access an item, tilt the top of the “basket” shelf down.



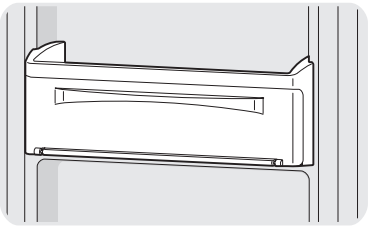
ADJUSTABLE DOOR BINS (SOME UPRIGHT MODELS)

Adjustable door bins are located inside on the freezer door and provide flexible storage space. The number of bins provided varies by model.



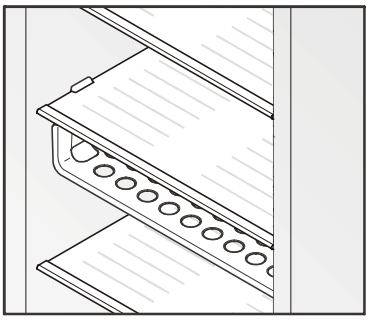
SOFT FREEZE ZONE (SOME UPRIGHT MODELS)

Soft Freeze Zone is specifically designed to maintain a higher temperature than the rest of the freezer to store products such as ice cream.



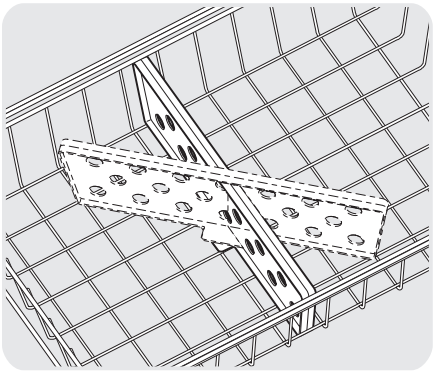
PIZZA SHELF (SOME UPRIGHT MODELS)

Here is the place to store up to four extra-large boxes of frozen pizza without ever having to dig them out from beneath a pile of other stored goods. The pizza shelf can be retracted to provide space for larger items on the shelf below, and still store up to two more pizzas.



BASKET DIVIDER (SOME UPRIGHT MODELS)

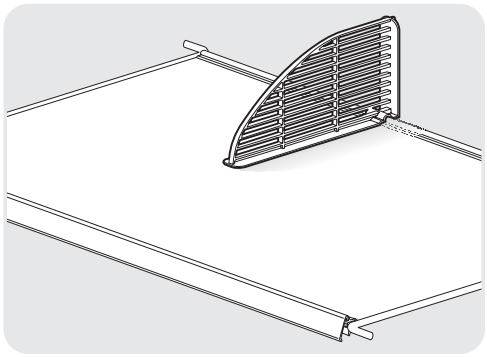
Use these handy dividers to keep the various items stored in your baskets more organized. To change the location of the divider simply slide your basket out, grab the divider from the center and rotate in a counter-clockwise direction until it is disengaged. To assemble, simply align as shown in the figure below and rotate in a clockwise direction until it spans into place.



SHELF BOOKEND (SOME UPRIGHT MODELS)

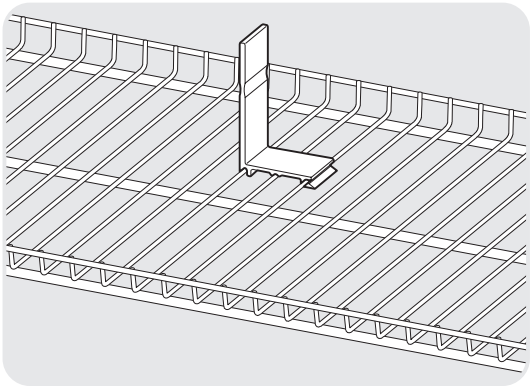
Glass Shelf Bookend

Use these handy bookends to keep the various boxed items stored neatly in your freezer. To adjust location, simply slide where desired.



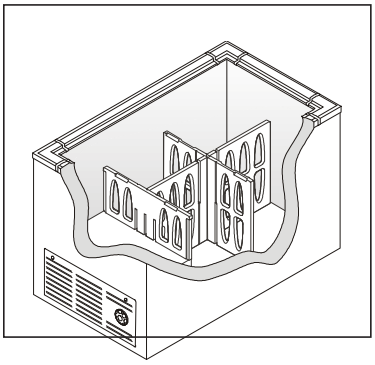
Wire Shelf Bookend

Use these handy bookends to keep the various boxed items stored neatly in your freezer. To adjust location,simply unsnap the bookend from the wire shelf and snap into the next desired location.

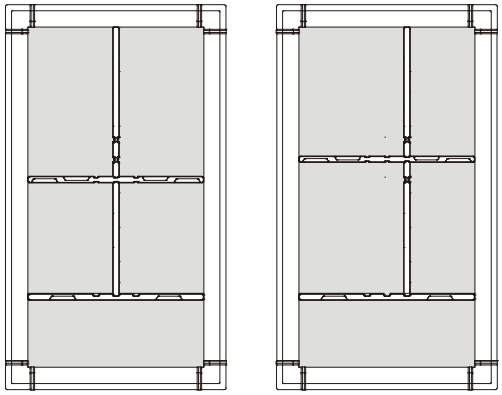


CHEST DIVIDER (SOME CHEST MODELS)

Use these clever dividers to custom-arrange a variety of different-sized storage bins in the bottom of your chest freezer. Use the peel-n-stick labels found in your literature packet to help remind you which items are stored where. If you have an item that isn't already covered by one of the pre-printed labels then use one of the blank labels and a permanent marking pen to make your own custom label. Labels can be peeled off when no longer needed and replaced by new and different ones.



Examples of Chest Divider Configurations:



CARE AND CLEANING

⚠CAUTION Damp objects stick to cold metal surfaces. Do not touch interior metal surfaces with wet or damp hands.

Freezer must be unplugged (to avoid electrical hazard) from power source when defrosting unit.

Some upright freezers are frost-free and defrost automatically, but should be cleaned occasionally.

BETWEEN DEFROSTINGS

To avoid frequent defrosting, occasionally use a plastic scraper to remove frost. Scrape with a pulling motion. Never use a metal instrument to remove frost.

DEFROSTING

It is important to defrost and clean the freezer when ¼ to ½ inch of frost has accumulated. Frost may tend to accumulate faster on the upper part of the freezer due to warm, moist air entering the freezer when the door is opened. Remove food and leave the door open when defrosting the freezer.

To Defrost Upright Models with Defrost Drain:

- Remove the drain plug on the inside floor of the freezer by pulling it straight out.
- To access external drain tube on models with a base panel, first remove the two screws from the base panel. Locate the drain tube near the left center under the freezer.
- Place a shallow pan under the drain tube. Defrost water will drain out. Check the pan occasionally so water does not overflow (see figure 1).
- A ½ inch garden hose adapter can be used to drain the freezer directly into a floor drain. If your model is not equipped with an adapter, one can be purchased at most hardware stores.
- Replace the drain plug when defrosting and cleaning are completed. If the drain is left open, warm air may enter the freezer.

To Defrost Chest Models with Defrost Drain:

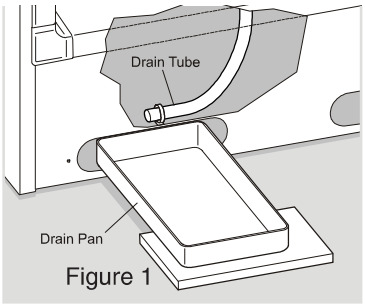


Figure 1

- Place a shallow pan or the Divider/Drain Pan (if equipped) beneath the drain outlet. Pull out the outside drain plug (see figure 2). A ½ inch garden hose adapter can be used to drain the freezer directly into a floor drain (see figure 3). If your model is not equipped with an adapter, one can be purchased at most hardware stores.
- Pull out the drain plug inside the freezer (see figure 4). Defrost water will drain out. Check pan occasionally so water does not overflow.
- Replace the drain plugs when defrosting and cleaning are completed. If the drain is left open, warm air may enter the freezer.

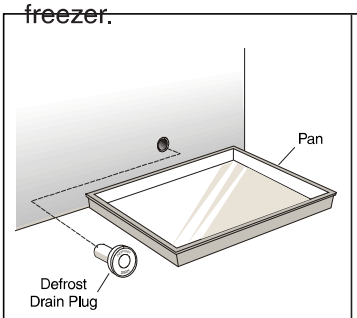

Figure 2

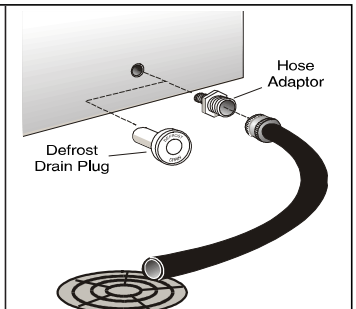

Figure 3

To Defrost Models without Defrost Drain:

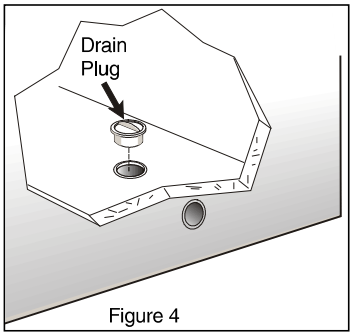

Figure 4

- Place towels or newspapers on the freezer bottom to catch the frost. The frost will loosen and fall.
- Remove the towels and/or newspapers.
- If the frost is soft, remove it by using a plastic scraper. If the frost is glazed and hard, fill deep pans with hot water and place them on the freezer bottom.
- Close the freezer door/lid. Frost should soften in about fifteen (15) minutes.
- Repeat this procedure is necessary.

CLEANING THE INSIDE

After defrosting, wash inside surfaces of the freezer with a solution of two tablespoons of baking soda in one quart (1.1 litres) warm water. Rinse and dry. Wring excess water out of the sponge or cloth when cleaning in the area of the controls, or any electrical parts.

Wash the removable parts and door basket with the baking soda solution mentioned above, or mild detergent and warm water. Rinse and dry. **Never** use metallic scouring pads, brushes, abrasive cleaners, or alkaline solutions on any surface. Do not wash removable parts in a dishwasher.

CLEANING THE OUTSIDE

Wash the cabinet with warm water and mild liquid detergent. Rinse well and wipe dry with a clean soft cloth. Replace parts and food.

Do not use razor blades or other sharp instruments, which can scratch the freezer surface when removing adhesive labels. Any glue left from the tape can be removed with a mixture of warm water and mild detergent, or touch the residue with the sticky side of the tape already removed. **DO NOT REMOVE THE SERIAL PLATE.**

VACATION AND MOVING TIPS

Short Vacations:

- Leave the freezer operating during vacations of less than three weeks.

Long Vacations:

If the freezer will not be used for several months:

- Remove all food and unplug the power cord.
- Clean and dry the interior thoroughly.
- Leave the freezer door open slightly, blocking it open if necessary, to prevent odor and mold growth.

Moving: When moving the freezer, follow these guidelines to prevent damage:

- Disconnect the power cord plug from the wall outlet.
- Remove foods, then defrost, and clean the freezer.
- Secure all loose items such as base panel, baskets, and shelves by taping them securely in place to prevent damage.
- In the moving vehicle, secure freezer in an upright position to prevent movement. Also protect outside of freezer with a blanket, or similar item.

⚠WARNING If leaving the freezer door open while on vacation, make certain that children cannot get into the freezer and become entrapped.

POWER FAILURE / FREEZER FAILURE

NOTE: Do not open freezer door unnecessarily if freezer is off for several hours.

If a power failure occurs, frozen foods will stay frozen for at least 24 hours if the freezer is kept closed. If the power failure continues, pack seven or eight pounds of dry ice into the freezer every 24 hours. Look in the Yellow Pages under *Dry Ice*, *Dairies*, or *Ice Cream Manufacturers* for local dry ice suppliers. Always wear gloves and use caution when handling dry ice.

If the freezer has stopped operating, see *Freezer Does Not Run* in the **Troubleshooting Guide**. If you cannot solve the problem, call an authorized servicer immediately.

If the freezer remains off for several hours, follow the directions above for the use of dry ice during a power failure. If necessary, take the food to a local locker plant until the freezer is ready to operate. Look in the Yellow Pages under *Frozen Food Locker Plants*.

TROUBLESHOOTING GUIDE	Before calling for service, review this list. It may save you time and expense. This list includes common occurences that are not the result of defective workmanship or materials in this appliance.	
PROBLEM	**CAUSE**	**CORRECTION**
FREEZER DOES NOT RUN		
Freezer does not run.	• Freezer is plugged into a circuit that has a ground fault interrupt. • Temperature control is in the OFF position. • Freezer may not be plugged in, or plug may be loose. • House fuse blown or tripped circuit breaker. • Power outage.	• Use another circuit. If you are unsure about the outlet, have it checked by a certified technician. • See **Setting the Temperature Control** Section. • Ensure plug is tightly pushed into outlet. • Check/replace fuse with a 15 amp time-delay fuse. Reset circuit breaker. • Check house lights. Call local Electric Company.
Freezer runs too much or too long.	• Room or outside weather is hot. • Freezer has recently been disconnected for a period of time. • Large amounts of warm or hot food have been stored recently. • Doors are opened too frequently or too long. • Freezer door may be slightly open. • Temperature Control is set too low. • Freezer gasket is dirty, worn, cracked, or poorly fitted.	• It's normal for the freezer to work harder under these conditions. • It takes 4 hours for the freezer to cool down completely. • Warm food will cause freezer to run more until the desired temperature is reached. • Warm air entering the freezer causes it to run more. Open doors less often. • See **"DOOR PROBLEMS"** Section. • Turn control knob to a warmer setting. Allow several hours for the temperature to stabilize. • Clean or change gasket. Leaks in the door seal will cause freezer to run longer in order to maintain desired temperature.
Interior Freezer temperature is too cold.	• Temperature Control is set too low.	• Turn the control to a warmer setting. Allow several hours for the temperature to stabilize.
Interior Freezer temperature is too warm.	• Temperature Control is set too warm. • Door is kept open too long or is opened too frequently. • Door may not be seating properly. • Large amounts of warm or hot food may have been stored recently. • Freezer has recently been disconnected for a period of time.	• Turn control to a colder setting. Allow several hours for the temperature to stabilize. • Warm air enters the freezer every time the door is opened. Open the door less often. • See **"DOOR PROBLEMS"** Section. • Wait until the freezer has had a chance to reach its selected temperature. • Freezer requires 4 hours to cool down completely.
Freezer external surface temperature is warm.	• The external freezer walls can be as much as 30°F warmer than room temperature.	• This is normal while the compressor works to transfer heat from inside the freezer cabinet.
SOUND AND NOISE		
Louder sound levels whenever freezer is on.	• Modern freezers have increased storage capacity and more stable temperatures. They require a high efficiency compressor.	• This is normal. When the surrounding noise level is low, you might hear the compressor running while it cools the interior.
Longer sound levels when compressor comes on.	• Freezer operates at higher pressures during the start of the ON cycle.	• This is normal. Sound will level off or disappear as freezer continues to run.

PROBLEM	CAUSE	CORRECTION
SOUND AND NOISE (Cont.)		
Popping or cracking sound when compressor comes on.	• Metal parts undergo expansion and contraction, as in hot water pipes.	• This is normal. Sound will level off or disappear as freezer continues to run.
Bubbling or gurgling sound, like water boiling.	• Refrigerant (used to cool freezer) is circulating throughout the system.	• This is normal.
Vibrating or rattling noise.	• Freezer is not level. It rocks on the floor when it is moved slightly. • Floor is uneven or weak. Freezer rocks on floor when it is moved slightly. • Freezer is touching the wall.	• Level the unit. Refer to "Leveling" in the **First Steps** Section. • Ensure floor can adequately support freezer. Level the freezer by putting wood or metal shims under part of the freezer. • Relevel the freezer or move freezer slightly. Refer to "Leveling" in the **First Steps** Section.
WATER/MOISTURE/FROST INSIDE FREEZER		
Moisture forms on inside freezer walls.	• Weather is hot and humid, which increases internal rate of frost build-up. • Door may not be seating properly. • Door is kept open too long, or is opened too frequently.	• This is normal. • See "**DOOR PROBLEMS**" Section. • Open the door less often.
WATER/MOISTURE/FROST OUTSIDE FREEZER		
Moisture forms on ouside of freezer.	• Door may not be seating properly, causing the cold air from inside the freezer to meet warm moist air from outside.	• See "**DOOR PROBLEMS**" Section.
ODOR IN FREEZER		
Odors in freezer	• Interior needs to be cleaned. • Foods with strong odors are in the freezer.	• Clean interior with sponge, warm water, and baking soda. • Cover the food tightly.
DOOR PROBLEMS		
Door will not close.	• Freezer is not level. It rocks on the floor when it is moved slightly. • Floor is uneven or weak. Freezer rocks on floor when it is moved slightly.	• This condition can force the cabinet out of square and misalign the door. Refer to "Leveling" in the **First Steps** Section. • Level the floor by using wood or metal shims under the freezer or brace floor supporting the freezer.
LIGHT BULB IS NOT ON		
Light bulb is not on.	• Light bulb is burned out. • No electric current is reaching the freezer.	• Follow directions under "Interior Light" in the **Freezer Features** Section. • See "**FREEZER DOES NOT RUN**" Section.

Major Appliance Warranty Information

Your appliance is covered by a one year limited warranty. For one year from your original date of purchase, Crosley will pay all costs for repairing or replacing any parts of this appliance that prove to be defective in materials or workmanship when such appliance is installed, used and maintained in accordance with the provided instructions.

*In addition to warranty shown above, ask your dealer about Crosley Extended Limited Warranty that comes to you at no extra charge for the 2nd through 10th years.

Exclusions

This warranty does not cover the following:

1. Products with original serial numbers that have been removed, altered or cannot be readily determined.
2. Product that has been transferred from its original owner to another party or removed outside the USA or Canada.
3. Rust on the interior or exterior of the unit.
4. Products purchased "as-is" are not covered by this warranty.
5. Food loss due to any refrigerator or freezer failures.
6. Products used in a commercial setting.
7. Service calls which do not involve malfunction or defects in materials or workmanship, or for appliances not in ordinary household use or used other than in accordance with the provided instructions.
8. Service calls to correct the installation of your appliance or to instruct you how to use your appliance.
9. Expenses for making the appliance accessible for servicing, such as removal of trim, cupboards, shelves, etc.,which are not a part of the appliance when it is shipped from the factory.
10. Service calls to repair or replace appliance light bulbs, air filters, water filters, other consumables, or knobs, handles, or other cosmetic parts.
11. Surcharges including, but not limited to, any after hour, weekend, or holiday service calls, tolls, ferry trip charges, or mileage expense for service calls to remote areas, including the state of Alaska.
12. Damages to the finish of appliance or home incurred during installation, including but not limited to floors, cabinets, walls, etc.
13. Damages caused by: services performed by unauthorized service companies; use of parts other than genuine Crosley parts or parts obtained from persons other than authorized service companies; or external causes such as abuse, misuse, inadequate power supply, accidents, fires, or acts of God.

DISCLAIMER OF IMPLIED WARRANTIES; LIMITATION OF REMEDIES

CUSTOMER'S SOLE AND EXCLUSIVE REMEDY UNDER THIS LIMITED WARRANTY SHALL BE PRODUCT REPAIR OR REPLACEMENT AS PROVIDED HEREIN. CLAIMS BASED ON IMPLIED WARRANTIES, INCLUDING WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO ONE YEAR OR THE SHORTEST PERIOD ALLOWED BY LAW, BUT NOT LESS THAN ONE YEAR. CROSLEY SHALL NOT BE LIABLE FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES SUCH AS PROPERTY DAMAGE AND INCIDENTAL EXPENSES RESULTING FROM ANY BREACH OF THIS WRITTEN LIMITED WARRANTY OR ANY IMPLIED WARRANTY. SOME STATES AND PROVINCES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, OR LIMITATIONS ON THE DURATION OF IMPLIED WARRANTIES, SO THESE LIMITATIONS OR EXCLUSIONS MAY NOT APPLY TO YOU. THIS WRITTEN WARRANTY GIVES YOU SPECIFIC LEGAL RIGHTS. YOU MAY ALSO HAVE OTHER RIGHTS THAT VARY FROM STATE TO STATE.

If You Need Service

Keep your receipt, delivery slip, or some other appropriate payment record to establish the warranty period should service be required. If service is performed, it is in your best interest to obtain and keep all receipts. Service under this warranty must be obtained by contacting Crosley at the addresses or phone numbers below.

This warranty only applies in the USA and Canada. Your appliance is warranted by Crosley Corporation. Crosley authorizes no person to change or add to any obligations under this warranty. Obligations for service and parts under this warranty must be performed by Crosley or an authorized service company. Product features or specifications as described or illustrated are subject to change without notice.
