Babies between 0-2 years old

PRICING

Unique size (27"¼ x 52" x 6") **\$349**

Temperature Regulation

Our Premium Foam keeps the baby warm when it's colder outside and cools them down in the warmer months.

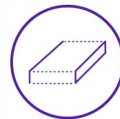

Organic Cover Tencel®

Our Tencel™ cover is soft, organic, biodegradable, and offers a high-performance eco-friendly solution that is more absorbent than cotton.

Ventilated Mesh

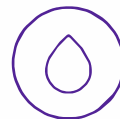

The mesh around the mattress helps the air to circulate even better, in order to maintain an ideal temperature.

Supportive Foam

Our open-cell foam offers better support and comfort than memory foam.

This helps with proper alignment which leads to better posture.

Waterproof

The mattress cover is waterproof but still breathable! Prevents any incidents that might happen.

The Polysleep Baby Mattress uses our **Premium Open-Cell Foam**. Measuring 6", it provides perfect airflow, support and comfort the baby needs to sleep sound every night. Our **Organic Breathable Cover Tencel®** offers a high-performance eco-friendly solution, it is softer than silk and cooler than linen, you'll sleep better when baby sleeps better. The cover is also **waterproof** to prevent any accidents from happening. Our Baby Mattress **relieves pressure** during nap time, thanks to our open-cell foam which helps the baby have a better alignment during his sleep.
