# CRESTRON. DO GUIDE

DM-TX-200-C-2G
Wall Plate DigitalMedia 8G+® Transmitter 200

DO Make Connections to the Rear Panel

Make connections to the rear panel of the Crestron® DM-TX-200-C-2G before installing the unit into an electrical box (not included) or floor box (not included).

24V 0.7A / **24 G** — 24 Vdc from power pack (included)

Ground — G

DM OUT — To DM® switcher, receiver, or other DM device or to HDBaseT® device

NOTE: The DM OUT port is a Power over DM (PoDM) and HDBaseT® PoE (Power over Ethernet) powered device (PD) port. To receive PoDM or HDBaseT PoE, the DM-TX-200-C-2G requires a connection to a DigitalMedia™ switcher or other equipment that has a PoDM or HDBaseT PoE power sourcing equipment (PSE) port. Any wiring that is connected to a PoDM or HDBaseT PoE PSE port is for intrabuilding use only and should not be connected to a line that runs outside of the building in which the PSE is located.

DO Install the DM-TX-200-C-2G

Install the DM-TX-200-C-2G into a 2-gang electrical box or into a 6-inch floor box.

### Installation into an Electrical Box

Install the DM-TX-200-C-2G into a 2-gang electrical box in a wall, floor, or ceiling. A minimum mounting depth of 2-1/2 inches (64 mm) is required.

To install the DM-TX-200-C-2G into an electrical box, do the following:

1. Using a Phillips head screwdriver, attach the DM-TX-200-C-2G to the electrical box using the four included #6-32 x 3/4-inch truss combo head screws.

2. Attach a decorator-style faceplate (not included) to the front panel of the DM-TX-200-C-2G using four screws (not included).
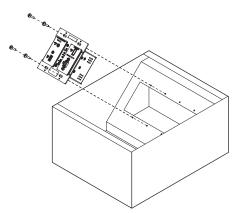

DO Check the Box

QTY	PRODUCT	PART NUM.
1	Power Pack, 24 Vdc 0.75 A, 100-240 Vac	2045866
4	Screw, #6-32 x 3/4", Truss Head, Combo	2009211

Installation into a Floor Box

Install the DM-TX-200-C-2G into a 2-gang opening in a 6-inch (153 mm) deep floor box.

Using a Phillips head screwdriver, attach the DM-TX-200-C-2G to an installed floor box using the four included #6-32 x 3/4-inch truss combo head screws.

DO Make Connections to the Front Panel

Make connections to the front panel of the DM-TX-200-C-2G as required for the application.

Unbalanced stereo line level audio input

Mouse/keyboard input

HDMI® digital video/audio input

RGB (VGA), component, S-video, or composite video input

DO Set the IP Address

The configuration of the DM-TX-200-C-2G within the DigitalMedia 8G+® system determines how the IP address of the DM-TX-200-C-2G is set:

- If the DM-TX-200-C-2G connects to a DigitalMedia switcher, the DM-TX-200-C-2G is configured by the switcher automatically.

- If the DM-TX-200-C-2G connects to a DigitalMedia 8G+ receiver, the DM-TX-200-C-2G uses its own configuration settings. By default, DHCP (Dynamic Host Configuration Protocol) is enabled. If it is desired that the default IP address be assigned to the DM-TX-200-C-2G, hold down the **SETUP** button while the unit boots up. The default IP address 192.168.1.239 overwrites the current setting. To manually set a different IP address, use the Crestron Toolbox™ application.

DO Learn More

Visit the website for additional information and the latest firmware updates. To learn more about this product, use a QR reader application on your mobile device to scan the QR image.
