- 1.5" AdaptiFoam™
- 1" Liquid Gel Flex Foam
- 8" Hybrid Base Foam with 3-Zoned Individually Pocketed Springs
- 1" Flex Support Base Foam

**ChiroPro 13" Plush**

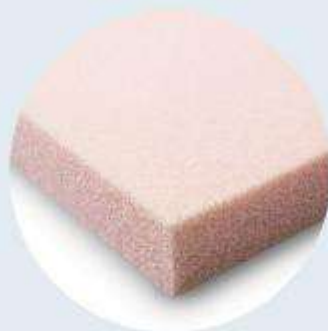

#### **Cooling Knit Fabric Cover**

This cover not only breathes, but the air flow creates a cooling sensation keeping you comfortable while you sleep. This highly advanced fabric stays cool-to-the-touch due to its superior breathability and temperature regulating properties that move heat away from the body.

#### **Gel AeroFusion™ Memory Foam**

This material takes memory foam to the next level. Micro-channels optimize airflow and temperature regulation to ensure you stay cool while still getting the comfort and pressure-relieving benefits memory foam is famous for. In addition, it offers supportive spinal alignment while maintaining a plush feel. This foam was previously labeled as AirCell Foam.

#### **AdaptiFoam™**

This specialty foam is engineered to be open-cell for breathability with all the rebound and firm support of latex while being allergy-free. Previously labeled as Smart Foam, the properties of this foam offer exceptional airflow and premium comfort.

#### **Liquid Gel Flex Foam**

This cooling foam is the third in our line of Flex Foams. It is a more breathable version of our Flex Comfort Foam with liquid cooling gel swirled into the foam's cellular-like structure. This keeps the sleeper cooler and allows more air to circulate through the foam layers.

#### **Zoned Spring Support**

This takes our Individually Pocketed Springs to the next level. We alternate the type of springs into separate zones with different support levels to match the other areas of the body. This offers better support in the areas that carry your weight while still conforming in the areas where more pressure is needed.
