Industry Best Warranty

20yr limited warranty | 5yr Valve warranty

**System
Dimensions**
10" D x 62" H

Whole House Filtration (WHF) systems are an essential part of the water treatment industry. Not to be confused with a water softener that uses ion exchange to remove calcium and magnesium from water, Whole House Filters reduce many of the other elements found in our water utilizing **Activated Carbon**.

When people say water filter, they most frequently mean a carbon filter of some variety. This is because carbon has been a standard feature in water treatment ever since the Egyptians discovered that storing water in charcoal made it stay fresher and taste better. Its centuries of popularity attest to its effectiveness.

Carbon reduces many **volatile organic chemicals (VOC)**, **pesticides** and **herbicides**, as well as **chlorine**, **benzene**, **trihalomethane (THM) compounds**, **radon**, **solvents** and hundreds of other man-made chemicals found in water.

Whole House filters provide **cleaner, healthier** water throughout the house including baths and showers where many of these impurities can be absorbed through the skin and inhaled in the shower.

Excellent as a stand-alone product or combine with a water softener for the **Ultimate in Whole Home Filtration**.

BENEFITS

- Improves the taste of water
- Uses no salt or potassium
- Reduces a wide range of known contaminants
- Delivers clean, filtered water throughout your home, including baths and showers
- **COMBINE WITH ANY WATER SOFTENER FOR THE ULTIMATE IN WHOLE-HOUSE WATER FILTRATION!**
