Brand: Modern

Product Description: Deep and dreamy, the three-over-three Ren Sofa is a transitional modern track arm design that genuinely feels as good as it looks. Styled with arms that are subtle & recessed, back and seats that are loose, and a bump-out front rail, this leather-only style demands the attention of everyone in the room. Available in a modular sectional, sofa, chair and ottoman, the Ren collection fits every interior need, and then some.

Collection Features: Deep & dreamy, the Ren is a transitional modern track arm sofa that genuinely feels as good as it looks. Designed with arms that are subtle & recessed, back and seats that are loose, and a bump out front rail, this leather-only style demands the attention of everyone in the room. Frame Construction: Our M upholstered furniture collection pieces are benchmade from sustainably sourced wood and upholstered start to finish by our skilled craftspeople in both North Carolina and Virginia. Every piece has been thoughtfully designed for today's modern lifestyle. Frames are constructed of sustainably certified kiln dried engineered hardwood. Frame parts are joined with precision cut interlocking joints that are glued, stapled to reduce movement, twisting and warping. Frames have cornerblocks that are glued and screwed at stress points, especially on seat rails and other high stress areas. Depending on rail thickness, frames may be of a hybrid construction, adding a solid hardwood inner frame to give seat rails additional support.

Seat Back: Loose seat back

Seat: Poly Down Innerspring Cushion - High resiliency plant-based foam core, with coil spring insert for added comfort and longevity. Wrapped with polyester and down fiber blend enclosed in down proof ticking.

Leather: Choice of over 30 leathers to choose from including finishes and aniline leather types

Padding: Padded outside arms and back for smoother surface and neater appearance.

Seating Construction: Seat bases are supported by a sinuous arc metal spring construction. Our springs are made from partially recycled content. Due to the design requirements of some styles, rubberized webbing may be used instead of springs. Double rows of springs are used at the corners for extra support. Seat bases are insulated with polypropylene fabric and are padded with synthetic fiber.
