1 Connect Posts to Bottom Shelf

WARNING: Tighten by screwing the leveler foot NOT the post.

A. Square Post

Square the post to the bottom shelf.

B. Connect Post

Screw foot with metal washer through bottom shelf and onto the end of an extruded post. Hand tighten fully and use wrench on hex nut to tighten nut onto underside of shelf.

2 Add Shelf Pegs & Door Hinges

A. Group Shelf Pegs

There are two varieties of shelf pegs (A and B). They are designed to cradle the shelf in place. Refer to drawing.

B. Insert Hinges, Shelf Pegs & Heavy Duty Bracket

Note: The door can be either left or right side opening. Select a side to open door.

3 Attach Door

A. Attach Hinges to Door Frames

Insert the hinges into the corresponding holes on the doors. Turn the screws 1/4 turn to the right to lock hinges in place. **NOTE: Do not over tighten or the hinge will break.**

Note: The hinge can be separated by pulling the black tab and pulling apart the hinge from the hinge base. Separated hinges snap back together.

B. Adjust Clearance

Doors should be 1/8" above the bottom shelf before fully tightening hinges to post. Use the wrench thickness as a guide for the bottom gap.

C. Rubber Stops

Attach the rubber stops to the inside of the door frame where it hits the shelf pegs when closing the door.

D. Door Pull

Screw the Door Pull into place.

4 Attach Rear Panel

A. Insert Hardware

Combine the 1" threaded studs with the flat nuts. Slide hardware into rear channel.

B. Place Panel

Allow bottom studs to remain loose at bottom of post. Align the Spacer Tool at the top of the post, then position top studs through the small "Rear Panel" hole. Repeat this step with the bottom studs aligning the Tool along the bottom of post to set spacing for cable passage.

C. Secure Studs

Use the hex key to secure the all studs to the posts.

5 Final Assembly

A. Placing & Adjusting Shelves

Place shelves from the bottom up. Angle the shelf in between the front post and set on top of shelf pegs. Use the Spacer Tool to adjust spacing between shelves. Position the peg through the Spacer and tighten.

B. Fine Tuning

Use the bubble level to precisely adjust the shelves. Be sure to level both sides as well as front to back. Use the hex key to tighten each peg.

C. Insert Side Panels

Carefully slide side panels down center channel of outside post. Be sure the posts are square to the bottom shelf to prevent any damage to side panels.

D. Secure Rear & Top

Put the remaining thumb nuts on to complete panel installation.
