- 4" Foamed-Mica Cellular Reinforced Woofer
- 1" Polyester Main Tweeter
- 6 ohm Speaker Impedance
- Optimized Crossover componentry for a clear audio path
- 145 W Maximum Input Power

Features

Room-filling sound

At first listen, the all new Core Series speakers will make your favorite audio tracks unfold throughout your listening environment, thanks to precise instrument reproduction, positioning, and even depth relative to an expansive soundstage.

Wide dispersion Super Tweeter

Prepare yourself for natural sounding vocals that shoot straight to the heart, thanks to the all-new Wide Dispersion Super Tweeter. The super tweeter is specifically designed to deliver ultra-responsive, high-frequency audio response (up to 50 kHz), ideal for High-Resolution listening, with wide directionality (sweet spot).

Mica-Reinforced Drivers

CS Series speakers utilize unique, foamed (dual-layer) mica woofer diaphragms-the upper surface delivers supple and faithful sound quality, while the bottom layer leverages low weight with great strength for powerful bass response.

Optimized Crossover Componentry

High-quality crossover networks using specially selected components assure minimal signal loss for energetic vocal response with even the most delicate emotional nuances. While being carefully mounted directly to the cabinet for vibration isolation.

Tight, powerful bass

Natural bass is realized through precise timing alignment across the entire frequency range. One listen and you will be mesmerized by the incredibly fast and powerful bass response that not only gives your music a solid foundation—it rocks your senses!

Specifications

Center Speaker		
Audio	Power Handling Capacity (max.)	145W
	Rated Impedance	6ohms
