Excellent for pulverizing tiny seeds. Additionally, my wife basically uses this every morning to grind coffee beans for our daily drink. She enjoys it so much. It works perfectly, and we haven't had any issues at all. I think it will go on for a while.

Great value for your money. Kitchen aid has never disappointed when it comes to their kitchen aid appliances and accessories. This item chops the spices so good it's like you bought them from the store. I highly recommend if you already have the grinding machine.

Kitchen aid has always gone out with great products for the price and the durability is good as well. The accessory kit with the spice cup and lid is perfect for grinding small seeds and spices. The blade design is completely different and does an excellent job of QUICKLY turning seeds into a fine powder that is much better for consumption, far better than the standard coffee grinder cup.

Cute little jar very useful for small quantity grinding like spices, coffee, etc. It grinds very fast and makes a smooth powder. Easy to clean and reuse.

A great addition to the Kitchen Aid Coffee Grinder. This grinder has a spice cup and lid and allows you to grind spices with an optimized blade design specifically for spices. Don't use your coffee grinder for anything other than coffee beans. Use this instead.
