- D TRI-TECH VISCO
- E ADAPTIVE FOAM
- F MEDIUM GEL FOAM
- G WRAPPED COILS
- H MOTION SEPARATION FOAM
- I FULL BODY SURROUND®  
EDGE SUPPORT

## COMFORT

### SILK & WOOL BLEND

This fine, balanced fiber blend provides surface breathability, cooling, and softness.

### QUILT VISCO

An instant pressure reliever, this layer within the quilted surface offers soft comfort to envelop the body from head to toe.

### PLUSH GEL QUILT FOAM

This layer of foam is infused with gel for unmistakable pressure relief, and placed just beneath the surface for immediate comfort.

## UPHOLSTERY

### TRI-TECH MEMORY FOAM

This responsive comfort layer is infused with copper, silver, and graphite.

### ADAPTIVE FOAM

This next generation memory foam does not affect ability to support.

### MEDIUM GEL FOAM

This cooling resilient foam provides pressure relief.

## SUPPORT

### WRAPPED COILS

Independently wrapped coils decrease motion transfer. Each coil contours to the body for individualized support.

### MOTION SEPARATION FOAM

An undetectable foam divider separates both sides of the bed to isolate motion and mitigate partner disturbance.

### FULL BODY SURROUND® EDGE SUPPORT

High density foam on all sides for a firmer sitting edge and 100% usable sleeping surface.
