All foams used by Southerland, Inc. are **CertiPUR-US® certified**, meaning that they meet the CertiPUR-US® standards for content, emissions, and durability.

Pre-stressed foam is used in our bedding to create comfort layers that are significantly more durable than those made from standard foams. "Pre-stressing" involves compressing foam to increase its comfort level and longevity. By pre-stressing foam, we minimize any change in feel or compacting of the foam that might occur in the future.

BETTER SLEEP, BY DESIGN.™
