\$15

Local Storage of Modeling Outputs

140

Estimated Quantity, Periodically, When

N/A

Estimated Hourly Operating Cost
(Estimated with 100% capacity utilization)

Your cost will depend on your utility rates and use.

- Cost range based only on standard capacity models.
- Estimated spending, not based on eight month built-up costs and a 2007 national average security cost of 16.66 cents per kWh and natural gas cost of 3.12¢ per therm.

The company itself has a low Emissions Emissions Index, but this is a straightforward calculation. It is more difficult to make a realistic estimate for the emissions of a company's high efficiency facilities, as the Emissions Index is determined by the emissions of a company's other facilities.

La nuova legge del 1997, infatti, prevede che ogni
atto legislativo emanato dal Parlamento europeo
deve essere approvato a sua volta dal governo
italiano, e che il Parlamento italiano deve approvare
la legge che autorizza il governo a ratificare il trattato
internazionale.
